Warranty and Returns Policy

Manufacturers Warranty

When purchasing goods from WHG.net Pty Ltd, the following products offer an extended manufacturer's warranty period.

- Gavita Lighting (excluding lamps) 3 years
- Hyper Fan Standard 5 years
- Hyper Fan Silenced 2 years

Where the warranty is not otherwise stated, the warranty period on all products is one year from date of purchase (limited to manufacturers faults only).

Credit Card Fees

Please be aware all credit card transactions will be charged at the following rate: Visa & Mastercard – 1.90%, Amex – 3.50%, Transaction Fee – \$0.55 and Bank Account Rejections – \$1.65.

Proof of Purchase

A receipt must accompany any warranty item with the date of purchase clearly displayed. Proof of purchase may come in the form of:

- GST tax invoice
- cash or hand written receipt with company name displayed
- credit or debit card statement
- warranty card showing the suppliers or manufacturers details, the date and amount of the purchase
- serial or production number linked with the purchase on the suppliers database
- a copy or photograph of the receipt

Disclaimer

Any or all damages claims shall be limited only to the product itself. In no way whatsoever will WHG.net be held responsible for any damages caused by or resulting from either the use or misuse of products occurring with or as a result of typical, incidental, indirect, special, consequential, handling or mishandling of any product sold by us in this catalogue or otherwise.

New Products

Mondi – 3 Piece Propagation Kit

3 piece Propagation Kit includes 545 x 280 x 64mm Base Tray, Mesh Seedling Tray and Vented Dome 180mm high, allows for taller cuttings. Adjustable vents for perfect humidity control.

For further information, please refer to the **"Propagation"** section.

Mesh Trellis Netting

Heavy duty nylon netting is ideal for supporting fast growing plants. 150mm mesh size. 1.5 x 4.5m of netting in retail pack.

For further information, please refer to the **"Gadgets & Growing Aids"** section.

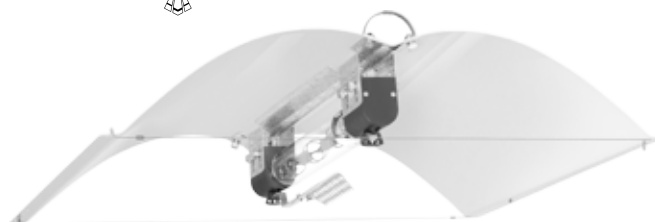

Adjust-A-Wings – 630W CMH Kits

High intensity, high reliability and unrivaled spectral output. The Adjust-A-Wings 630W CMH light kit comes with a double jacket, double ended 3100K lamp which incorporates bespoke Japanese arc tubes and crystal quartz glass jackets. Lamps have been matched perfectly to the specialist Square Wave low frequency e-ballast. Ideal for medium grow spaces (1.2m x 1.2m up to 1.8m x 1.2m footprint) and for mixing between HPS lamps to provide complete spectral diversity (CRI of 84).

For further information, please refer to the **"Ballasts, Light Kits & Controllers"** section.

New Products

R600 6.5kg Butane

Clean, colourless and non-odourized. R600 N-Butane is 99.99% pure and supplied in DOT-APPROVED 4BA-240 cylinders. Each cylinder is equipped with an internal liquid siphon dip tube so that inverting the cylinder is not required to deliver liquid butane. Bottle fitting is a 1/4" male SAE thread.

For further information, please refer to the "Gas" section in "Cloud Cave".

SenSen – HJ Submersible Pumps & Impellers

WHG now stock the HJ range of SenSen pumps and a full range of impellers for both HQB and HJ pumps. SenSen are ultra tough, ultra reliable submersible water pumps. The impellers come with ceramic shafts suitable for use in high salinity environments. SenSen pumps come with a 1 year warranty.

For further information, please refer to the "Irrigation" section.

Adjust-A-Wings – 315W CMH Kits

High intensity, high reliability and unrivalled spectral output. The Adjust-A-Wings 315W CMH light kit comes with a class leading 4K lamp which uses bespoke Japanese arc tubes and XOS borosilicate jackets. Lamps have been matched perfectly to the specialist Ultra High Frequency (150KHz) e-ballast. Ideal for small grow spaces (1m x 1m footprint) and for mixing between HPS lamps to provide complete spectral diversity. Key grower benefits include: remote ballast for out of room mounting, closer lamp placement, deeper canopy penetration, explosive growth, shorter internodal length and increased terpene/essential oil production.

For further information, please refer to the "Ballasts, Light Kits & Controllers" section.

New Products

Hellion – 315W CMH Single Ended Lamps

Adjust-A-Wings Hellion raises the bar with the introduction of two new 315W Ceramic Metal Halide lamps (3100K & 4200K). Both utilise bespoke Japanese arc tubes and are fitted with industry standard E40 mogul bases for versatility and improved reliability (fits any standard reflector). The use of XOS borosilicate glass jackets further enhances harmonic stability, cooler lamp operation and extended lamp life at over 10,000 hours (one-year warranty). When tested in an integrating sphere the 4200K lamp showed a 7.5% increase in output over the industry leading lamp (tests available upon request). The 3100K lamp will maintain its PPF intensity far longer than any other 3000K 315W lamp currently available for consistently higher yields over its two-year lamp life.

For further information, please refer to the [“Lamps & Globes”](#) section.

Adjust-A-Wings – Defender Small

WHG is proud to expand the Adjust-A-Wings range with the addition of the small Defender hood. Weighing in at under 2.5kgs (with lamp holder) and offering a near perfect 1m x 1m footprint, the small defender is perfect shade for 315 CMH, 250w MH and all compact fluorescent lamps.

For further information, please refer to the [“Reflectors & Light Spreaders”](#) section.

GRODAN – AO36/40 cubes (36x36x40mm) **grodan**

AO 36/40 cubes are a great option in place of MM40/40 and come in convenient tear away slab format. No plastic trays or individual wrappers to contend with and designed to transplant perfectly into Delta 4G cubes with holes (75x75x60). Available in a Carton of 2940 plugs (30 sheets of 98).

For further information, please refer to the [“Substrates, Pots & Trays”](#) section.

New Products

AZ Instruments – EC and pH Meters

AZ Waterproof EC Pen

AZ Waterproof EC pens raise the bar in ease of use, reliability, function and price point. AZ meters provide a big IP65 LCD screen with dual EC and temperature display. Wide measuring range from 0-9999ppm and a temperature range of -5°C to +60°C. Waterproof IP65 keypad with simple calibration. Also includes a hold button to freeze current readings in low visibility. ATC (auto temperature compensation) ensures accurate readings in all climates. Auto off function maximizes battery life.

AZ Waterproof pH Pen

AZ Waterproof pH pens raise the bar in ease of use, reliability, function and price point. AZ meters provide a big IP65 LCD screen with dual pH and temperature display. Wide pH measuring range from 0 to 14 and a temperature range of -5°C to +60°C. Waterproof IP65 keypad with simple one touch auto calibration. Also includes a hold button to freeze current readings in low visibility. ATC (auto temperature compensation) ensures accurate readings in all climates. Auto off function maximizes battery life.

For further information, please refer to the **"pH Buffers & Aids"** section.

Rootex – Powder, Liquid and Gel

Rootex Powder (3g/kg), Liquid (4g/L) and Gel (4g/L) contains naturally occurring auxins and plant hormone IBA which encourages, strikes and accelerates roots on plant cuttings. Suitable for semi hardwood plant types. Soft wood (1g/kg) and hardwood (8g/kg) formulas are also available upon request.

For further information, please refer to the **"Propagation"** section.

New Products

Digi-Lumen Ballasts

Digi-Lumen 4D dimmable ballasts are the latest generation of digital ballasts. Clever engineering makes for cost effective and electrically stable ballasts that are suitable for harsh conditions and high voltage power grids. Digi-Lumen ballasts come with the ability to change the power output to four unique settings. This offers a complete plant lighting solution from one light kit including seed & clone mode (250W), vegetative & power save mode (400W), flower mode (600W) and Super-Lumens mode for extreme flowering on cooler days (660W). Simply dim the ballast if temperatures get to high and turn it back up when they cool. Digi-Lumen ballasts will operate both MH and HPS 600W Single Ended lamps.

For further information, please refer to the ["Ballasts, Light Kits & Controllers"](#) section.

Digi-Lumen Light Kits

Digi-Lumen light kits are the most affordable complete electronic light kit (ballast, lamp and reflector) yet seen in Australia. The kits include a 4D dimmable ballasts are the latest generation of digital ballasts. Clever engineering makes for cost effective and electrically stable ballasts that are suitable for harsh conditions and high voltage power grids. Digi-Lumen light kits come with the ability to change the power output to four unique settings. This offers a complete plant lighting solution from one light kit including 'Seed & Clone Mode' (250W), 'Vegetative and Power Save Mode' (400W), 'Flower Mode' (600W) and 'Super-Lumens Mode' for extreme flowering on cooler days (660W).

For further information, please refer to the ["Ballasts, Light Kits & Controllers"](#) section.

Pro Grow – 620W HPS SE 2K Lamp

The new Pro Grow HPS 620W single ended lamp exceeds the output of even the best European branded lamps. All Pro Grow lamps offer up-rated components specifically tuned for use with high frequency digital ballasts. Improvements include, more robust frame wire material, extruded ceramic arc tubes (not molded) decreased frame wire thickness (for reduced shadow print) and low iron glass for enhanced UV penetration. Grow like a pro at half the cost of equivalent Euro branded lamps.

For further information, please refer to the ["Lamps & Globes"](#) section.

New Products

Green Planet – Rezin

Rezin was developed to greatly increase plant resin production. Rezin leverages the production of terpenes to amplify the essential oil and aroma profile of your plants. A byproduct of this exact process means that it also improves overall plant health. It will visually improve the “crystalline” appearance of the finished flowers and also improve the growth rate in the vegetative cycle. Rezin does not contain any plant growth regulators (PGRs) or banned and restricted bio-stimulators. Rezin is made from a combination of Ascorbic, Citric, Gluconic and Lactic Acids created through a proprietary fermentation process. Unlike other products, it will not impact the ppm/EC of your nutrient solution, allowing you to run your base nutrients at full strength.

For further information, please refer to the **“Additives”** section.

Green Planet – Vitathrive

Vitathrive is a comprehensive blend of carefully selected vitamins and minerals designed to reduce plant stress while supporting essential functions.

The latest scientific research has gone into this formulation to make sure that your plants get all of the support they need. Vitathrive is the best anti-stress product on the market today.

Vitathrive can be used on cuttings, transplants and for general health. A must have product!

For further information, please refer to the **“Additives”** section.

Green Planet – Pro Cal

Pro Cal is the ultimate in calcium magnesium supplementation and should be used on a regular basis with your Green Planet nutrient program. Pro Cal is used throughout the vegetative and flowering stages and ceasing use in the last week of the flowering stage which is usually a flush week incorporating REZIN and water.

For further information, please refer to the **“Additives”** section.

Green Planet – Plant Guard

Plant Guard is a potassium silicate supplement, which may increase the rigidity of your plant's cell walls. Use Plant Guard when your plant is subjected to changing environments and stress.

For further information, please refer to the **“Additives”** section.

Nutrients - Hydroponics

Green Planet – GP3 (3 part)

This unrivalled 3 part nutrient system consists of a combination of all primary, secondary and micronutrients in three separate formulas; Grow, Bloom and Micro. GP3 contains pure ingredients, better nutrient ratios, a more complete formulation, better results and overall better value. It contains no carbonates or synthetic dyes and has the cleanest salt and residue index available. GP3 contains three unique chelated iron sources designed for a broad range of pH environments.

	Retail	Catalogue No.

For further information, please visit www.growingexposed.com

Green Planet – Dual Fuel (2 part)

Dual Fuel is the newest and most advanced 2 part on the market. It contains no carbonates or synthetic dyes and has the cleanest salt and residue index available. This complex commercial grade formulation has been concentrated in order to reduce volume of nutrients in the grow room. This reduces shelving, storage, handling and plastic bottle waste/disposal. A true 'sludge free' two part nutrient solution. When mixed, it will naturally set to pH 6 – 6.5, reducing the need for more chemicals and adjustments.

GrowHard – Nutriponics

Nutriponics keeps it to basics with this traditional 2 part hydroponic solution. It contains the base 16 mineral elements as per all hydroponic solutions and at only 4mL per litre it's the best value for money nutrient solution available on the market. Now with three unique chelated iron sources designed for a broader range of pH environments.

Rock – Fusion (1 part)

Fusion Grow and Fusion Bloom are the strongest, most concentrated single part nutrients we can possibly produce, rivalling even the strongest two part nutrients. The concentrated strength is not the only asset of Fusion; Rock Fusion Nutrients are made with our unique 'Nutrient Density' technology, which means that the amount of effective nutrients available to the plant is much higher than in other products. Fusion has all the components for massive yields packed tightly into each bottle.

	Retail	Catalogue No.

5L Bloom	\$134.40	RFB5

Rock – Star

Rock Star ensures that all of the essential nutrients that a plant craves are there when needed. The simple to use two part formula means you only need one set of nutrient for your Grow and Bloom cycles. For superior results, use with the full Rock Program of Rock Nitro, Rock Supercharge and Rock Resinator. Rock star is completely pH stable when used with the Rock additive line.

	Retail	Catalogue No.

Nutrients - Hydroponics

Nulife – Power Gro (2 part)

Powergro hydroponic 2 part solution was developed by an agronomist who has been involved in horticulture for over 35 years . The great benefits of Powergro are fewer nutrient changes and better balanced products, giving healthier crops. 42% stronger nutrient means more money in your pocket. Needs only to be changed every 3-4 weeks when using GOOD QUALITY water ie: water not exceeding 150ppm.

	Retail	Catalogue No.
1L A&B Grow	\$31.50	PGG1

Nulife – HyperGro (1 part)

HyperGro 1 part solution contains not only the highest percentage of calcium than any of the clear single part nutrients available but in addition it contains compounds not contained in any other nutrient. These compounds allow the plant to take up more nutrient than it would normally. In effect the plant is being "force fed".

	Retail	Catalogue No.
1L Grow	\$18.50	HGG1

4L Bloom	\$43.45	HGB4
20L Bloom	\$168.20	HGB20

Nutrients - Hydroponics

Nulife – CocoFeed (2 part)

CocoFeed has been developed in response to the increasing use of coconut fibre or coco peat. Coco peat has several characteristics that called for a modified nutrient. Coco peat contains varying amounts of salt depending on its source. Nulife Technologies CocoFeed has increased amounts of calcium to cope with this problem. The added calcium displaces the salt in the coco peat and it is washed out through the drainage water.

	Retail	Catalogue No.

Hydromino Coco (2 part)

Hydromino Coco is a cutting edge product which utilises amino bonding technology and an antimicrobial surfactant, which permits the user to have lower than normal conductivity ppm/E.C/T.D.S level whilst still obtaining premium results. To your final volume of water add equal parts of Hydromino A & Hydromino B. To be used with coco based soils.

Benefits: Premium results, lower conductivity, designed for large plants grown in all conditions, utilises amino bonding technology and organic compounds.

	Retail	Catalogue No.

Nutrients - Hydroponics

Hydromino Premium Nutrients (2 part)

Hydromino Premium Nutrients are designed to be used in any available Hydroponic growing medium e.g. perlite, rockwool or coir based. It is to be used for a rapidly advancing vegetative plants containing premium additives e.g. wormT, fulvic acid & additional essential macro and micro nutrients for optimum growth. This cutting edge product utilises amino bonding technology plus it contains several organic compounds. In addition an antimicrobial surfactant is present. All of these components permit the user to have a lower than normal conductivity ppm/E.C/T.D.S level while still obtaining premium results.

Benefits: Optimum growth, lower conductivity, utilises amino bonding technology & organic compounds.

Hydromino – Powdered Nutrients

Hydromino A Powder is a specifically formulated NPK based powder with essential trace elements suitable for fertigation, drip irrigation and foliar spray for all types of plants, vegetables, fruits & flowers.

Features: Manusol 36, N-P-K-7:4:24.5 plus trace elements is a commercial general use soluble fertiliser for fertigation and foliar spray uses.

Hydromino B Powder is calcium nitrate and contains two of the basis nourishment elements that plants require, first of which is nitrate, and second is calcium. Calcium nitrate is an excellent choice and an essential part of all fertigation in all soils and climates.

Features: Calcium roles - Cell wall and general structure, cell membrane function, protection from aluminium and manages toxicity. Plant defence and improved photosynthesis. Helps to improve root contact with soil. Nitrate - reduces ammonium within the roots and foliage of the plants. This ammonium is converted to nitrogen for amino acid formation required by all plants.

Hydromino C Powder is a potassium nitrate in a granular form. Potassium nitrate is a soluble source of two major essential plant nutrients and is commonly used as a fertiliser on high value plant, vegetable, fruit and flowering crops that benefit from the use of nitrate and potassium.

Features: Both N & K are required by plants to support harvest quality, protein formation, disease resistance and water use efficiency which is applied to soil or through the irrigation system during the growing season to support healthy growth.

Hydromino D Powder is monopotassium phosphate in a powder form. As a nitrogen free fertilizer, it is a good source of phosphorus and potassium throughout the flowering stage of sugar rich fruit crops.

Features: Fully water soluble, consists of 100% plant nutrients, free of chloride, sodium and other detrimental elements that can effect plant growth. Neutral pH and salt index, suitable for fertigation and foliar application.

Nutrients - Hydroponics

Hydromino Accelerant & Floreate (2 part)

Hydromino Accelerant/Floreate A & B are designed to be used in conjunction with perlite and rockwool mediums. They are best suited for plants with enhanced growth conditions and for a CO₂ enriched environment, utilising amino bonding technology. In addition an antimicrobial surfactant is present. These components permit the user to have a lower than normal conductivity ppm/E.C/T.D.S. level present while still obtaining premium results.

Benefits: Premium results, lower conductivity, utilises amino bonding technology and organic compounds.

Liquid Science Powdered Nutrient

Liquid Science powdered nutrient packs are a highly soluble and extremely ph stable blend. Liquid Science has two satchels in both part A and part B. The separation into two further parts makes it much more concentrated and more soluble than other competing powdered nutrient brands. Liquid science is a full spectrum nutrient (24 elements). The 5kg pack makes 3000L and the 20kg makes 14,000L making it the best value powder line available.

Additives

Green Planet – Massive

Massive Bloom Formulation incorporates naturally occurring gibberellic hormones designed to increase internodal spacing allowing more room for the flower to mature and swell to full potential. When flower sites have been established, the components in Massive Bloom Formulation work aggressively to produce and transport vital fluids and cell building materials to the flower sites creating truly massive stacked flower clusters full of aromatic essential oils. Massive Bloom Formulation couples the naturally occurring gibberellic hormones with the scientifically proven plant steroid triacontanol that increases the rate of photosynthesis and CO₂ utilisation.

Use: From week 3 of flower and throughout the duration of the flowering cycle.

	Retail	Catalogue No.
1L	\$20.00	MAS1

Green Planet – PK Spike (0-14-15)

PK Spike is formulated to provide a uniform quantity of phosphorus and potassium to your flowering plants. Designed with over 25% more P/K than the next industry leading brand, this product can be applied at a maximum rate of 1mL/L to achieve a 250ppm P/K spike to your plants.

Use: Begin use in week 2 of flowering cycle.

	Retail	Catalogue No.
1L	\$35.00	PKS1
5L	\$150.00	PKS5
25L	\$340.00	PKS25
207L	\$1,160.00	PKS207

Green Planet – Rezin

Rezin was developed to greatly increase plant resin production. Rezin leverages the production of terpenes to amplify the essential oil and aroma profile of your plants. A byproduct of this exact process means that it also improves overall plant health. It will visually improve the “crystalline” appearance of the finished flowers and also improve the growth rate in the vegetative cycle. Rezin does not contain any plant growth regulators (PGRs) or banned and restricted bio-stimulators. Rezin is made from a combination of Ascorbic, Citric, Gluconic and Lactic Acids created through a proprietary fermentation process. Unlike other products, it will not impact the ppm/EC of your nutrient solution, allowing you to run your base nutrients at full strength.

Use: Vegetative – Apply 1ml per litre during the last two weeks of the vegetative cycle to prime the plant for bloom. Bloom – Apply 1ml per litre during the first two weeks of bloom. Increase to 2ml per litre in week 3. Continue using until harvest.

	Retail	Catalogue No.
1L	\$65.00	REZ1
5L	\$240.00	REZ5
25L	\$565.00	REZ25
207L	\$2,035.00	REZ207

Additives

Green Planet – Vitathrive

Vitathrive is a comprehensive blend of carefully selected vitamins and minerals designed to reduce plant stress while supporting essential functions.

The latest scientific research has gone into this formulation to make sure that your plants get all of the support they need. Vitathrive is the best anti-stress product on the market today.

Vitathrive can be used on cuttings, transplants and for general health. A must have product!

Use: Vegetative – Apply 1-2ml per litre (4-8ml/gal) throughout the entire vegetative cycle.

	Retail	Catalogue No.
1L	\$65.00	VT1
5L	\$240.00	VT5
25L	\$565.00	VT25
207L	\$2,035.00	VT207

Green Planet – Pro Cal

Pro Cal is the ultimate in calcium magnesium supplementation and should be used on a regular basis with your Green Planet nutrient program. Pro Cal is used throughout the vegetative and flowering stages and ceasing use in the last week of the flowering stage which is usually a flush week incorporating REZIN and water.

Key Points:

- Thickens cell walls
- Helps form calcium pectate
- Fully chelated iron
- Important source of magnesium
- Noticeable size increase
- Noticeable size increase
- Improved enzyme function
- Coco coir approved
- Powerful formulation

Use: 1.2ml per litre throughout the vegetative stage and moving up to 1.8mls per litre for the flowering stage stopping prior to the flush week.

	Retail	Catalogue No.
1L	\$20.00	PC1
5L	\$55.00	PC5
25L	\$200.00	PC25
207L	\$1,760.00	PC207

Green Planet – Plant Guard

Plant Guard is a potassium silicate supplement, which may increase the rigidity of your plant's cell walls. Use Plant Guard when your plant is subjected to changing environments and stress.

Directions:

- Use 1/2 ml per litre every feeding
- Discontinue 2 weeks prior to harvest

	Retail	Catalogue No.
1L	\$55.00	PG1
5L	\$210.00	PG5
25L	\$450.00	PG25
207L	\$1,540.00	PG207

Additives

Left Coast – Terpinator

Terpinator is formulated to increase the concentration of terpenoids in aromatic plant oils and glands. The unique composition of Terpinator provides the basic building blocks that plants require to produce flavourful oils. By using naturally occurring plant and biological compounds, unique enzymatic pathways within a plant's body are utilised to enhance the production of terpenoids and plant oils. These glands are brought to their maximum potential and size using Terpinator along with a nutrient regimen. Terpinator also catalyses steps in a plant's normal metabolism that will protect and prolong fragrances of your plant's dried fruits and flowers.

Use: You can use TERPINATOR® during the entire life cycle of the plant. Add 2mL per litre in the vegetative stage and 5mL per litre throughout the flowering stage.

	Retail	Catalogue No.
1L	\$85.00	TERP1
5L	\$250.00	TERP5
25L	\$595.00	TERP25
207L	\$4,540.00	TERP200

For further information,
please visit Terpinator.com

Ozi Magic – Monsta Bud

Monsta Bud is Australia's oldest and most trusted high organic plant food and nutrient mix. Monsta Bud increases yields and boosts essential oil production. Monsta Bud is a special bioorganic blend of high quality base mineral salts combined with a range of over 80 different organic compounds including soluble seaweed, beeswax extract (triacontanol), humic & fulvic acid and other natural plant extracts. Monsta Bud promotes and ensures a happy root zone and vigorous plant growth using the natural synergy between the growing medium and plant nutrient uptake.

Use: First six weeks of flowering.

	Retail	Catalogue No.
1L	\$15.50	MB1
5L	\$50.00	MB5
10L	\$90.00	MB10
25L	\$200.00	MB25

Ozi Magic – Ozi Tonic

Ozi Tonic is a unique bioorganic mix made from specially selected high quality base mineral salts that Ozi Magic have combined with a range of secret organic compounds, and other natural plant extracts. All are scientifically blended together and formulated specifically for a perfect synergy between this great Ozi plant tonic, and the world famous Australian owned and made Monsta Bud high organic plant food.

Use: Last two weeks of flowering.

	Retail	Catalogue No.
1L	\$19.50	OT1
5L	\$70.00	OT5
10L	\$135.00	OT10
25L	\$340.00	OT25

Additives

Ozi Magic – Sweet Az

Sweet Az is the perfect flowering catalyst with constituents of essential metabolites and enzymes designed to enhance your feeding program and maximise the results given. You will experience increased yields, flavour and essential oil production with any nutrient mix and Sweet Az. However the results are best when using Sweet Az with the Ozi Magic nutrient range as it has been formulated specifically for use with Magic Bud Grow, Monsta Bud and Ozi Tonic.

Use: Last four weeks of flowering

	Retail	Catalogue No.
1L	\$19.50	SA1
5L	\$70.00	SA5
10L	\$135.00	SA10
25L	\$340.00	SA25

Ozi Magic – Bud Swell

Bud Swell brings together the very best combination of bioorganic and specially selected high quality base mineral salts that Ozi Magic can offer. Ozi Magic utilises a range of secret organic compounds, and other natural plant extracts all scientifically blended together and formulated specifically for a perfect synergy between this additive and the world famous Australian owned and made Monsta Bud high organic plant food.

Use: Last 4 weeks of flowering

	Retail	Catalogue No.
1L	\$19.50	BS1
5L	\$70.00	BS5
10L	\$135.00	BS10
25L	\$340.00	BS25

Ozi Magic – X-Ellerator

X-Ellerator is designed to speed up germination of seeds and growing of the seedling and to protect against all seedling diseases. A combination of propagation tonic, female seed soak and clone accelerator. Mix X-Ellerator with water and use to moisten your propagation blocks. X-Ellerator may also be used freely as a foliar spray.

Use: Seeds, seedlings and clones.

	Retail	Catalogue No.
250mL	\$10.70	XL250

Additives

W2G – Pro PK

Pharmaceutical grade soluble liquid potash for heavy yields. When you initiate flowering there is a massive surge in the plant's requirement for potassium. Lowered potassium levels will restrict the plants growth to match the available potassium reducing flowers and yield, whilst correct potassium levels will ensure an optimal flowering time and a higher yield.

Use: One week before commencement of flowering and first 3-4 weeks of flower.

	Retail	Catalogue No.
1L	\$18.50	PPK1
5L	\$55.00	PPK5
20L	\$200.00	PPK20

Nu-Life – Weight Plus Potassium

Weight Plus Potassium is a highly concentrated form of Potassium and Phosphorous which, when added to the nutrient solution in the bloom phase of plants, allows for luxury uptake of weight producing potassium.

Potassium is used by the plant in a great number of its processes. It is so important that the plant will take up amounts in excess of its needs. This extra potassium is used in the construction of the cell walls of the plant and so adds to the weight of the final plant.

Use: One week before commencement of flowering and first 3-4 weeks of flower.

	Retail	Catalogue No.
1L	\$23.00	WPP1
4L	\$60.00	WPP4
20L	\$230.00	WPP20

Additives

GrowHard – NutriBoost

NutriBoost is a plant vigour tonic that utilises Vitamin B, NAA and kelp extracts. It has been developed to increase vigour in all stages of plant growth and can be used to increase the speed and vigour of plant propagation, reduce the stress from transplant shock and heat related stress. NutriBoost also Improves lateral branching development. NutriBoost is the great all rounder and a better replacement for Superthrive, especially in hydroponics systems due to its purity and very low residual properties.

Use: Plant/tree transplanting, cuttings, seedlings, vegetative growth and first few weeks of flowering.

Hot Tip: Go straight onto Bud Juice for next stage of flowering.

	Retail	Catalogue No.
500mL	\$40.00	NB500
1L	\$75.00	NB1
5L	\$370.00	NB5
25L	\$1300.00	NB25

GrowHard – Bud Juice

Bud Juice provides growers with the very best of old and new nutrient technology whilst remaining totally organic. This combination approach to producing the ultimate flowering enhancer gives growers a product that achieves results far beyond what nature intended. Achieve extraordinary yields from a 100% totally safe and natural flowering additive. Natural plant hormones, plant vitamins, fulvic extracts, kelp and other complex organics work together to bolster your plant's metabolic process and push plant growth, yield and flavours to an unprecedented high.

Use: Week 3 to 7 of flowering.

Hot Tip: Finish with Liquid Lead.

	Retail	Catalogue No.
1L	\$80.00	BJ1
5L	\$320.00	BJ5
25L	\$1300.00	BJ25

Additives

GrowHard – Liquid Lead

Liquid Lead stimulates the plant into the final flower production phase and with compounds extracted from plant tissue allowing the plant to hold additional weight when dry. For aroma and flavour Liquid Lead is loaded with easily absorbed short and long chain naturally occurring carbohydrates and with yucca acid to help absorption of macro and micronutrients. Liquid lead stimulates natural oil production leading to an increase in potency and flavour as well as allowing maximum brix (sugar) levels to be achieved within the plant.

Use: Last three to four weeks of the flowering period.

	Retail	Catalogue No.
1L	\$36.00	LL1
5L	\$120.00	LL5
25L	\$470.00	LL25

GrowHard – Brix +

BRIX + is a unique formula containing 100% organic naturally derived amino acids, carbohydrates, vitamins, enzymes and a secret blend of proven biological yield enhancers. BRIX + was developed for customers who want the highest quality floral production combined with increased overall product weight. Naturally occurring sugars blended with a complex array of other organic compounds provide the plant with all the benefits of organic production coupled with the most superior end yield weight. Gains of over 8% have been recorded in end dry weight using BRIX +.

Use: Last 5 days of flower period.

	Retail	Catalogue No.
1L	\$50.00	BP1
5L	\$175.00	BP5
25L	\$650.00	BP25

Additives

GrowHard – Bitch'n

Say no to seeds. Bitch'n allows the plant to rebalance its flowering hormone levels by increasing auxin production and decreasing gibberellin production within the plant. This formula allows the plant to reduce the hormonal effects of plant stress including heat stress, rapid barometric change or poor/disadvantaged genetic quality. These factors can all lead to the plant trying to reproduce, resulting in seed production and overall loss of target yield, fruit/flower weight and quality.

Use: Directly prior to onset of flowering and during flowering.

Use on genetics prone to hermaphrodism or on fruits/flowers/vegetables experiencing (or expecting) unseasonally warm temperatures during fruit/flowering. Prevention, not cure.

	Retail	Catalogue No.
1L	\$60.00	BIT1
5L	\$260.00	BIT5
25L	\$995.00	BIT25

GrowHard – Bud Meister Organic

Bud Meister Organic provides growers with the very best of old and new nutrient technology whilst remaining totally organic. This combination approach to producing the ultimate flowering enhancer gives growers a product that achieves results far beyond what nature intended. Achieve extraordinary yields from a 100% totally safe and natural flowering additive. Natural plant hormones, plant vitamins, fulvic extracts, kelp and other complex organics work together to bolster your plants metabolic process and push plant growth, yield and flavours to an unprecedented high.

Use: Week 3 to 7 of flowering.

	Retail	Catalogue No.
1L	\$90.00	BMO1

Additives

Nulife – U Turn

U-Turn is designed to control and limit the upward growth of plants by stopping the wood and leaf growth, therefore turning all the plant's energy into producing the fruit/flower.

Use: Once only on day 14 of the flowering period. Follow up with Full Bloom Enhancer 7 days later.

	Retail	Catalogue No.
1L	\$60.00	UT1
20L	\$1,100.00	UT20

Nulife – Full Bloom Enhancer

Full Bloom Flower Enhancer is designed to multiply fruit sets whilst dramatically increasing the size and weight of the fruit/flower.

Use: Once on day 21 of flowering period, 7 days after using U Turn.

	Retail	Catalogue No.
1L	\$60.00	FBE1
20L	\$1,100.00	FBE20

Additives

Nulife – Nitro Boost

The problem of slow initial growth affects many crops. Quite often this problem is caused by a lack of nitrogen that, in itself, has a number of causes. In recirculating systems, denitrification may occur due to a lack of oxygen in the system. There is quite a demand for oxygen not only by the plant but also by various bacteria within the system. Nitro Boost is compounded from slow and fast release forms of organic nitrogen and is an inexpensive method of overcoming most deficiencies.

Use: In vegetative stages of growth if leaves are paling and light green. Also increase oxygen to nutrient solution and reduce nutrient temperature to 22°C Max. Ensure drainage is adequate and working.

	Retail	Catalogue No.
1L	\$18.00	NNB1
4L	\$40.00	NNB4
20L	\$284.00	NNB20

Nulife – MegaYield

Root growth during the flower period is mainly limited to replacement of dead roots. Indeed, even the activity slows as the developing flowers and fruit compete for food with the roots. After a time, root death exceeds replacement. The plant is able to do this and still reproduce itself, which is its natural function in life. The plant is happy to do this and doesn't care what the grower wants. MegaYield overcomes this natural process and stimulates root production. This extra root production enables enhanced uptake of nutrients over and above that which would happen normally. The result is heavier yields through swelling (tumescence) of all flower parts.

Use: Plant/tree transplanting, cuttings, seedlings, vegetative growth and first half of flowering.

	Retail	Catalogue No.
1L	\$20.00	MY1
4L	\$50.00	MY4
20L	\$199.00	MY20

Nulife – MegaYield Gold

MegaYield Gold is an expertly crafted mixture of vitamins, minerals, plant hormones and plant extracts that are designed to accelerate shoot growth, which in turn boosts plant growth rates. It also acts as a growth stimulant that protects the plants from the effects of stress. MegaYield Gold can be used on hydroponic and soil grown plants.

Use: All stages of plant growth, from clones to fully mature plants.

	Retail	Catalogue No.
1L	\$35.00	MYG1
4L	\$110.00	MYG4
20L	\$350.00	MYG20

Additives

Karma – Atomic

Atomic is the jewel in the Karma Innovations crown. Atomic is a natural flower, brix, resin and yield stimulator. It consists of a special blend of natural mineral phosphate, potassium, manganese and boron. It's not the amount of the element in Atomic that makes it perform so well, it's the quality of the ingredients. Atomic is the ultimate companion to Rock Resinator. It will outperform all others.

Use: From the 3rd week of flowering cycle, until the cycle is complete.

	Retail	Catalogue No.
1L	\$90.00	KA1
5L	\$450.00	KA5
20L	\$1100.00	KA20

Rock – Burst

Rock Burst is a totally unique formulation of naturally derived active ingredients, which is designed to generate reproductive energy in a variety of crops. Rock Burst is a concentrated mixture of organic acids, all natural plant extracts and mineral salts all working synergistically to gently shock the plant or tree into a reproductive flurry.

Use: All stages of plant growth, from clones to fully mature plants.

	Retail	Catalogue No.
1L	\$45.00	RB1
5L	\$200.00	RB5

Rock – Nitro

Rock Nitro is a highly concentrated nitrogen additive which accelerates plant growth and development. Rock Nitro creates a stronger more vigorous plant with increased energy production to speed up growth. Rock Nitro provides essential available nitrogen to the plant if/when they develop deficiencies. Rock Nitro assists especially well in coco coir, where nitrogen has reduced bio-availability.

Use: From rooted cutting & seedling stage throughout the growth cycle.

	Retail	Catalogue No.
1L	\$40.00	RN1
5L	\$120.00	RN5

Additives

Rock – Resinator

Rock Resinator should be the final addition to your growing cycle. Many products on the market claim improved quality and smell or better yields. Yet many growers are left frustrated with the lack of visible results. And, after the hard work of getting your crops to harvest you certainly don't want the disappointment of inferior crops. So don't leave it to chance. Try Rock Resinator now and you'll never want to grow without it.

Use: After the second week of flowering through to harvest at a rate of 1ml per litre for lower EC's and up to 2ml per litre for higher EC's.

	Retail	Catalogue No.
1L	\$40.00	RR1
5L	\$145.00	RR5
20L	\$490.00	RR20

Rock – Super Charge

Rock Supercharge will also help cure root sickness and disease, repairing most of the common problems growers face. Rock Supercharge can be used to help improve average yields or growers who struggle to get the most from their second or third growth cycle.

Use: Throughout the entire growth and flowering process at a rate of 2mL per litre. If your plants are suffering from disease, add an additional 1mL per litre to ensure a return to good health.

	Retail	Catalogue No.
1L	\$40.00	RS1
5L	\$145.00	RS5
20L	\$490.00	RS20

Rock – Super Growth

Double your plants vegetative growth in one week with no internodal stretching. Save a week off the grow time whilst keeping tight nodes and super chunky stems and leaves. Simply add one bottle to a 200L drum, pH adjust back to pH7 and add nutrients. Contains phosphoric acid and must be used with pH up to maintain nutrient solution of above pH 5.5+.

Use: Second week of the vegetative phase.

	Retail	Catalogue No.
100mL	R\$70.00	RSG100

Additives

Hydromino Silica

Hydromino Silica is a mineral plant additive, which assists the plant to maximise its health and improve its resistance against plant disease. Silica will increase weight and bulk, helps with nutrient intake, improves disease resistance, increases photosynthesis, reduces heat and water stress, salinity and chlorine uptake. This will enable Silica to be in the root mass. Benefits include increased weight & bulk and helps nutrient uptake & increases photosynthesis.

Use: from seedlings/cuttings to harvest.

	Retail	Catalogue No.
1L	\$20.00	HMS1
5L	\$60.00	HMS5
20L	\$180.00	HMS20

Hydromino Liquid Mag

Hydromino Liquid Mag is used to increase the concentration of magnesium in your nutrient solution. Liquid Magnesium will reduce the chances of deficiencies in the flowering cycle whilst running higher levels of base nutrients. Benefits include increasing the concentration of magnesium & aids in reducing deficiencies.

Use: At a ratio of 2-8mL per litre in the flower cycle especially the last 4 weeks

	Retail	Catalogue No.
1L	\$25.00	HMLM1
5L	\$80.00	HMLM5
20L	\$260.00	HMLM20

Hydromino Fulvic

Hydromino Fulvic enhances cell growth and increases oxygen and nutrient uptake. The small molecular size of Fulvic Acid allows it to enter the vascular system of plants. Fulvic Acid easily binds to minerals such as iron, calcium, copper, zinc and magnesium. Whilst moving through the roots, stem and leaves, it takes these minerals to metabolic sites within the plant. The ability of Fulvic Acid to bind to trace minerals makes it an effective organic chelating compound. Fulvic Acid is a non-toxic mineral additive and water binder that maximises the plants productivity. Benefits include: enhancing cell growth, increasing CO₂ uptake, stimulating plant immune system and improving cation exchange capacity.

Use: Foliar spray throughout growth cycle and up to week 4 of bloom.

	Retail	Catalogue No.
1L	\$20.00	HMF1
5L	\$50.00	HMF5
20L	\$150.00	HMF20

Additives

Hydromino Recovery

Hydromino Recovery is the ultimate repair kit to combat against nutrient deficiencies and nutrient lockout. It is formulated to dramatically increase healing time after such problems as heat stress and inadequate watering. Hydromino benefits include preventing nutrient deficiencies, ultimate repair kit and combating against nutrient lockout.

Use: Recovery can be used as either a one-time fix or an alternate between a root zone conditioner/repair week in and week out, which will result in producing an extremely healthy system.

	Retail	Catalogue No.
1L	\$30.00	HMR1
5L	\$100.00	HMR5
20L	\$400.00	HMR20

Hydromino B-Vital

Hydromino B-Vital is specially formulated to assist heat stressed and shocked plants caused by transplanting, under/over watering and disease. B-Vital is specially formulated using K, E, D, A, B12, B6, B2 & B1 vitamins that assist in reducing heat stress and shock caused by transplanting, under and over watering and disease. B-Vital helps with the development of a healthy root mass and thus a healthier plant mass. All of which will affect your overall end result. Benefits include stress relief, vitamins B12, B6, B2 & B7 increase and helps with deficiencies.

Use: Directly after transplanting or when plants are not well from overwatering or heat stress.

	Retail	Catalogue No.
1L	\$85.00	HMBV1
5L	\$370.00	HMBV5

Hydromino Supersize

Hydromino Supersize is a premium last stage of flower production booster and will enable your plants to receive everything that they require in the later stages of your flower cycle. Supersize does this by promoting cell expansion and replication for larger flowers and does this via the use of its unique set of powerful ingredients that will stimulate your plants to reach their full potential. Benefits include stimulating oil production, girth & weight.

Use: Mid flowering booster and finisher.

	Retail	Catalogue No.
1L	\$30.00	HMSS1
5L	\$100.00	HMSS5
20L	\$350.00	HMSS20

Additives

Hydromino Potash

Hydromino Potash is ideal for providing additional potassium for flowering plants. Potash is not a complete fertiliser, but is an additive to boost potassium levels without effecting nitrogen or phosphorus levels. Benefits include providing additional potassium for flowering plants, lower conductivity and utilises amino bonding technology.

Use: From week 2 of flowering until harvest.

	Retail	Catalogue No.
1L	\$20.00	HMP1
5L	\$60.00	HMP5
20L	\$180.00	HMP20

Hydromino Bud Boost

Hydromino Bud Boost is an organic based flowering enhancer derived from naturally occurring enzymes, macro and micro nutrients which in turn will result in an increase of essential oils. This product will assist in a quicker than normal flower production, therefore an overall increase in flowering sites helping to improve quality and end of yield results. Benefits include kick starting flower production, increased weight and volume, increased disease resistance and enhanced yield size.

Use: At the onset of the flowering cycle through to mid/late flowering.

	Retail	Catalogue No.
1L	\$90.00	HMBB1
5L	\$350.00	HMBB5

Hydromino Wormilizer

Hydromino Wormilizer is a totally natural and organic solution. With organic Wormilizer you can put back into your garden what over 100 years of civilisation has taken out. Scientific tests have proven that the high level of nutrients in Hydromino Wormilizer will ensure your garden receives the best natural food to stimulate all plant growth. Benefits include natural & organic bio activity, high level of nutrient availability and highly stimulated plant growth.

Use: From seedlings/cuttings to harvest.

	Retail	Catalogue No.
1L	\$20.00	HMW1
5L	\$50.00	HMW5
20L	\$150.00	HMW20

Additives

Hydromino Incredi-Bud

Hydromino Incredi-Bud will assist in maximising plant growth and yield. With extensive research on the growth of a range of plants, combined with our state of the art manufacturing plant and processes, has enabled us to develop this unrivalled product. Hydromino Incredi-Bud is unique and the only product of its kind. During testing Hydromino Incredi-Bud was ahead of the field of competitor's products, and this is due to Hydromino Incredi-Bud's unique ratios of phosphorous, potassium, magnesium and amino acids. Derived from amino acids, citric acid, potassium phosphate, magnesium sulphate and magnesium phosphate. Benefits include maximising plant growth and yield.

Use: From the onset of flowering to harvest.

	Retail	Catalogue No.
1L	\$30.00	HMIB1
5L	\$100.00	HMIB5
20L	\$400.00	HMIB20

Liquid Science – SEED & CLONE

Liquid Science SEED & CLONE Solution is an advanced formulation designed specifically for the accelerated germination of seeds and cuttings, as it contains all the necessary plant hormones needed to increase strike rate and accelerate root development. Seed & Clone works best as a pre-soak for propagation material. Use warm water and Seed & Clone solution as per the recommended dosage rates. Continue to use Seed & Clone as the nutrient source until the transplanting stage.

Use: In conjunction with Liquid Science Plant Wax for best results.

	Retail	Catalogue No.
250ml	\$6.50	SC250
500ml	\$10.50	SC500
1L	\$17.50	SC1
5L	\$65.00	SC5

Foliar Sprays

Nulife – Quick Start (Clone Accelerator)

For faster strike rates, more vigorous clones and healthier immediate root growth. Adapted from commercial plant propagation practices, Quickstart has a sound scientific basis. As well as a comprehensive range of plant nutrients balanced and adjusted for the use of the clone when applied through the leaves as a foliar spray, Quickstart has two special features found in no other product of its type. The first is a slow release form of phosphorous and the second is a specialised carrier which carries the nutrients through the leaf surfaces and into the leaf cells. Because of this, absorption into the leaf is rapid and complete.

Use: Foliar spray onto cuttings immediately after taking. Continue every third day until roots appear.

	Retail	Catalogue No.
1L	\$15.00	QS1
4L	\$50.00	QS4
20L	\$125.00	QS20

Liquid Science – PLANT WAX

Liquid Science PLANT WAX is a water soluble emulsifiable polymer concentrate which can be sprayed on leaves to form a semi-permeable biodegradable layer. Traditionally, horticulturists trim the leaves of cuttings to reduce transpiration and hence losses from dehydration before the clone has time to generate roots and begin to absorb water. Plant Wax reduces the transpiration rate of most plants that are exposed to extreme temperatures. Plant Wax is also ideal in reducing stress throughout the transplant stage. When sprayed on the leaf surface Plant Wax slows down the transpiration rate by as much as 50%, enabling the plant to put more energy into root zone development.

	Retail	Catalogue No.
1L	\$19.50	PW1
5L	\$75.00	PW5
25L	\$230.00	PW25

Foliar Sprays

Liquid Science – GREEN-UP Vegetative Foliar/Additive

Liquid Science GREEN-UP is a vegetative plant additive, ideal for crops experiencing yellowing off or slow development. GREEN-UP is a rich nitrogen and magnesium based additive which stimulates vegetative growth in all plants, especially leaf crop vegetables. GREEN-UP is fast acting and very effective on plants experiencing Leaf yellowing or necrotic leaf symptoms. GREEN-UP is suitable for both soil and hydroponic use.

Use: in Vegetative stage as a foliar spray or nutrient additive until yellowing ceases.

	Retail	Catalogue No.

BudWise – Plant Feminiser

BUDWISE is designed to influence the most important stage of floral development, being the initiation & sexual differentiation of flowering buds to their most female form. BudWise can also increase the size and weight of female flowers via specific hormonal triggers.

Use: Immediately prior to the flowering period in the dark cycle. Repeat application 10 days later. BudWise also kills male flowers shortly after contact which stops the further spreading of pollen (which causes the seeds to form). Spray directly onto male flowers soon as they are identified.

	Retail	Catalogue No.
50ml	\$29.00	BW50
200ml	\$89.00	BW200

Probiotics and Root Repair

W2G – Probiotics

A billion little microbial minions that live only to clean your root system! Probiotics contains 16 species of Endo and Ecto Mycorrhizal Fungi, 8 species of Trichoderma, 57 beneficial bacteria microorganisms with 1.4 billion probiotic colony forming units per every gram. Probiotics outcompete and starve anaerobic (bad) bacteria and keeps your roots whiter than snow.

Use: Seedlings, rooted cuttings and all cycles of plant growth and flower.

Run to waste: Re-introduce Probiotics weekly directly into the pots. Bring them to life first in a bucket of tepid water with two tablespoons of raw sugar and an air stone. Brew for 6 hours stirring regularly. Further dilute and distribute evenly into individual pots with a watering can.

Recirculation or header tank application: A Bio Ball filter (think tropical fish tanks) on the side of your header tank will ensure billions of healthy bios have a permanent, well oxygenated home to multiply and continually re-inhabit your root zone. Otherwise apply as per run to waste.

IMPORTANT - Keep water temperatures between 18°C and 25°C. Oxygenate the tank and keep water permanently agitated.

	Retail	Catalogue No.
300gm	\$60.00	W2GPB

Microbial

Microbial is a wide-ranging aqueous solution derived in part from naturally occurring plant extracts. Microbial is non-toxic to humans, animals and plants and is totally biodegradable and environmentally friendly. Microbial acts as a micro-cleanser and plant conditioner, which cleans and rejuvenates plants. This allows the plant to naturally withstand attacks from common pests and biological contaminants like bacteria, fungi, algae and viruses.

Use: Microbial can either be applied directly onto the leaf surface or as a rootzone additive.

1L	\$35.00	MIC1
5L	\$140.00	MIC5
25L	\$550.00	MIC25

Mammoth P / Microbe Phosphorus Booster

MAMMOTH P is the first organically derived microbial inoculant that maximizes phosphorus and micronutrient cycling to maximize flower growth, increase yield, and enhance plant health. Our supplements contain some consortia of live microbes that function as self-replicating bioreactors that are 30x better at liberating nutrients than the average microbial community. Like micro bioreactors, our beneficial bacteria continually produce enzymes that function to mobilize nutrients in the growth medium. Extensively tested by Colorado growers, and proven to increase growth by independent labs. Mammoth P reduces the need for a separate enzyme additive. MAMMOTH P naturally accelerates the nutrient supply to plants to increase plant health, quality, and yield.

Use: All stages of plant growth for up to 16% higher yields.

Probiotics and Root Repair

Nulife – Stopwilt

When the roots are damaged, the plant is unable to take up enough water and nutrients to satisfy its requirements and therefore is not able to close its stomata due to lack of potassium in the guard cells. Stopwilt supplies the potassium in an easily assimilable form. Potassium triggers the guard cells to close the stomata allowing water and nutrients to once again store correctly within the leaves and recover while the roots re-establish.

Use: ½ mL per litre of nutrient solution as a preventative and 1mL per litre if disease is or has been a problem.

	Retail	Catalogue No.
1L	\$70.00	SW1
4L	\$200.00	SW4
20L	\$700.00	SW20

Nulife – AU 60

The technological breakthrough came when we were able to isolate the very substance that the plants use to fight disease. To put quite simply, AU 60 Root Repair fights disease for the plant. This allows the plant to flourish uninhibited by disease and grow more roots to facilitate a greater food production, thus growing bigger, stronger and healthier. AU 60 Root Repair is a non-toxic pesticide. AU 60 is an organic, naturally occurring substance that controls disease.

Use: 1mL per litre of working solution at every nutrient change.

4L	\$80.00	AU604
20L	\$290.00	AU6020

Nulife – Power Active

Power Active is a CROP SPECIFIC culture of beneficial bacteria that are known to give increased growth when associated with the roots of crops. HERE'S HOW IT WORKS: These bacteria have been isolated and cultured specifically for hydroponic systems and crops under HID lights. Every millilitre of culture contains millions of bacteria ready to start work in your crop IMMEDIATELY. Experience shows that these bacteria make nutrients more available to the plant's roots. They are able to displace root disease organisms and synthesise hormones and vitamins. These hormones and vitamins are available to the plants as the bacteria colonise the roots creating cleaner systems, increased vigour, healthier roots, stronger stems and increased yields.

Use: Seedlings, rooted cuttings and all cycles of plant growth and flower.

Probiotics and Root Repair

GrowHard – Revived

Iron (Fe) deficiency is a plant disorder also known as "lime-induced chlorosis". Symptoms include leaves turning yellow or brown in the margins between the veins which may remain green, while young leaves may appear to be bleached. Iron becomes unavailable for absorption if pH is not between 5 and 6.5. The most common problem is excessive alkalinity of above 6.5. Iron deficiency can also develop if the medium is over-watered or over-fertilised. Revived gives back iron to the plant in an easily assimilable form, allowing the chlorophyll to build quickly and leaves to 'green up' so photosynthesis can return to full potential. IMPORTANT: pH levels should be lowered to pH6 when using this product.

Use: ½ mL per litre of nutrient solution as a preventative or 1mL per litre if chlorosis has occurred.

	Retail	Catalogue No.
1L	\$20.00	REV1
5L	\$80.00	REV5
25L	\$350.00	REV25

GrowHard – FU 63

FU 63 Root Repair is the most effective root restoring compound yet! Derived completely from organic substances it is non-toxic to plants, humans and beneficial microbes. Use immediately after your plants have suffered a root zone attack from either insects, fungus or if they have been exposed to under or over watering. FU 63 will stimulate new root growth and protect existing roots from further attack allowing your plant to get back to their original health.

Use: 1mL per litre of working solution at every nutrient change.

Propagation

Rootex – Powder, Liquid and Gel

Rootex Powder (3g/kg), Liquid (4g/L) and Gel (4g/L) contains naturally occurring auxins and plant hormone IBA which encourages, strikes and accelerates roots on plant cuttings. Suitable for semi hardwood plant types. Soft wood (1g/kg) and hardwood (8g/kg) formulas are also available upon request.

Use: Dip the freshly cut end immediately into the Rootex Powder, Liquid or Gel. Cover the entire stem 1cm past the exposed cut. Use a pencil (or similar) to poke a planting hole into your chosen substrate. Carefully insert the cutting approximately 3cm into the planting hole. Avoid knocking off the rooting compound.

pH Buffers & Aids

AZ Instruments – EC and pH Meters

AZ Waterproof EC Pen

AZ Waterproof EC pens raise the bar in ease of use, reliability, function and price point. AZ meters provide a big IP65 LCD screen with dual EC and temperature display. Wide measuring range from 0-9999ppm and a temperature range of -5°C to +60°C. Waterproof IP65 keypad with simple calibration. Also includes a hold button to freeze current readings in low visibility. ATC (auto temperature compensation) ensures accurate readings in all climates. Auto off function maximizes battery life.

- Wide measuring range up to 160mS
- Dual display Temp. & Conductivity or TDS with ATC
- Water proof IP65 membrane keypad
- Low cost design with high accuracy
- Quick response and easy to calibrate
- Adjustable TDS factor from 0.3 to 1.0
- Auto power off
- Hold function to freeze current measurement.

	Retail	Catalogue No.
AZ EC & TDS Pen	\$75.00	AZEC

AZ Waterproof pH Pen

AZ Waterproof pH pens raise the bar in ease of use, reliability, function and price point. AZ meters provide a big IP65 LCD screen with dual pH and temperature display. Wide pH measuring range from 0 to 14 and a temperature range of -5°C to +60°C. Waterproof IP65 keypad with simple one touch auto calibration. Also includes a hold button to freeze current readings in low visibility. ATC (auto temperature compensation) ensures accurate readings in all climates. Auto off function maximizes battery life.

- Low cost pH pen
- Big LCD dual display Temp. & pH value with ATC
- One touch for auto-calibration
- Waterproof housing meets IP65 rating
- Automatic buffer recognition to avoid errors during calibration

Pest Control

Ozi Magic – Terminata

Terminata is fully organic and completely non toxic to plants, humans and animals. Terminata can be used as much as daily as a prevention for spider mites, white fly, thrips and fungus gnats. Constant preventative use is required for a fully organic crop.

Use: Minimum 3 times a week from seedling/cutting stage right through to the last two weeks of flower.

	Retail	Catalogue No.
500mL	\$20.00	OMT

Mite Rid

Mite-Rid works by providing a barrier which is harmless to the plant, but fatal to the mites. Some of the components of Mite-Rid are also absorbed by the plant and then suppress the life cycle of the mites. Mite-Rid uses a unique formula of botanical oils, including neem, garlic, eucalyptus plus surfactants to provide a protective barrier against many leaf eating pests, and most effectively, the Spider Mite. The main active ingredient from neem oil is a limonoid called azadirachtin which has the steroids campesterol, beta-sitosterol, and stigmasterol. These interrupt the normal hormonal balance of mites, suppressing their reproductive cycle.

Use: Spray generously to the underside and top of the leaves. Repeat 3 to 4 days later to ensure any eggs that survived and hatched are treated before they themselves lay more eggs.

	Retail	Catalogue No.
45mL	\$25.00	MR45
250mL	\$125.00	MR250

Pest Control

Kill A Mite

Kill A Mite is a registered pesticide used as a foliar spray for the effective control of mites. Kill A Mite is concentrated and is used at 1mL per litre of water. A 100mL bottle of Kill A Mite will make 100 litres of solution. Masks and gloves are recommended when using this product.

Use: Spray generously to the underside and top of the leaves. Repeat 3 to 4 days later to ensure any eggs that survived and hatched are treated before they themselves lay more eggs.

	Retail	Catalogue No.
100mL	\$40.00	KAM100

Scarid 10

Scarid 10 is a registered pesticide for the prevention of scarid fly infestation. Scarid 10 is a concentrate and should be applied at a rate of 30mL per litre of water.

Use: Spray onto growing medium once a week trying to avoid contact with plant.

	Retail	Catalogue No.
100mL	\$40.00	S100

Insect Glue Traps

Insect Glue Traps are the stickiest glue traps available and are twice the size of competing glue traps (20cm x 15cm). The special proprietary 'dry glue' is so strong it can even catch mice! Insect Glue Traps attract and capture all flying insects so you may identify and evaluate the pests on and around your plants, and implement a preventative pesticide plan before things get out of hand. At under \$2.00 each (retail) they are a product everyone should use.

Use: Hang around your room at random position/heights and check daily for trapped insects.

Calclear – Mobile Soft Water

Calclear is the most effective method of freeing up Calcium & Iron and delivering it in its most soluble form to your plants. By polarizing your hard/town water with Calclear, minerals stop clumping, do not fall out of solution and become readily available for plant uptake. The end result is faster growth, thicker stem and leaf tissue, greener leaves & increased photosynthesis, decreased instances of tip burn, decreased pest infestations, increased flower size and increased net dry weight (up to 30% in certain varieties).

Calclear does not decrease water flow, does not require filter replacements and doesn't waste any water. Cal/Mag & Iron supplements are not necessary when using Calclear as there is plenty of free calcium/iron in your hard/mains water already (insoluble without Calclear). Calclear completely eliminates all salt buildup resulting in perfectly clean, free flowing irrigation systems. Larger sizes are available for 32mm, 50mm, 80mm & 100mm Ø pipes.

Use: Run Calclear 24/7.

Recirculation: Connect to the feeder line between the nutrient tank and the plants (19mm fittings standard).

Run to Waste: Connect Calclear to a looped pipe from your nutrient tank agitating pump and return it back in to the nutrient tank.

	Retail	Catalogue No.
Mobile Softwater (19mm)	\$1250.00	CAL1

Gadgets & Growing Aids

Shield – Sulphur Vapourisers

The Shield Sulphur Vapouriser is a great way of combating black & grey mould, powdery mildew, mites and other common problems for greenhouse and indoor plants. It works by melting and vapourising pure sulphur granules at the perfect temperature. The sulphur exchanges into the air where it redistributes over the surface of the leaves/flowers forming an invisible plant shield. Mould spores die upon immediate contact and pests must relocate or suffer the consequences.

Use: At the onset of the flowering period. Stop two weeks before harvest. Treats up to a 20x20m² area. Use every third day for 1 hour during late evening or lights off period. If tip burn occurs, reduce by 5-10 minute intervals until burn stops.

	Retail	Catalogue No.
Sulphur Vapouriser	\$125.00	SSV
Sulphur Refills	\$20.00	SSVR

Panda Zippa's

The original Zippa! Includes two x 250um heavy duty door zippers with heavy duty (YKK easy glide) size 10 zips. Each panel is 25cm wide with overlapping inner flaps that are 100% light tight when fitted with quality tape.

	Retail	Catalogue No.
2 per pack	\$60.00	ZIP

TNB – Natural CO₂ Enhancer

The Enhancer is made from all natural, 100% organic ingredients which when activated create a blast of CO₂ that can reach 1200ppm in a 1.5 x 1.5 x 2.4m area. Activate the Enhancer by simply adding 1 litre warm water, placing the lid back on, removing the sticker on the lid, covering the small hole with your thumb and giving the bottle a quick shake. It's as simple as that!

Use: All throughout the flowering period. Ensure the water temperature is below tepid when first activating (approx 22°C). Shake the bottle daily. Approximate lifespan is 2 weeks per bottle/re-fill.

	Retail	Catalogue No.
TNB Bottles	\$55.00	TNB
TNB Refills	\$40.00	TNBR

Mammoth – Web

Trellis netting is a long-practiced gardening technique that not only assists in canopy management that allows for optimum plant's exposure to air and light, but also helps maximize space and reduces ground contact that may result in spoilage due to mould and fungus. Can fit to 16mm - 25.4mm tent frames.

	Retail	Catalogue No.
Web 60-100	\$10.00	MAW60

Mammoth – Strap

Mammoth Straps are made of heavy duty nylon and are perfect suspending small to medium sized carbon filters in the tent. Diameter: 55cm.

	Retail	Catalogue No.
Mammoth - Strap (2 Per Pack)	\$2.00	MS

Mammoth – Hold

Support, pull down or hold up plant stems and flowers. Adjustable up to 150cm.

	Retail	Catalogue No.
Mammoth - Hold (4 per pack)	\$2.50	MH

Gadgets & Growing Aids

Mammoth – Adjust

Mammoth Adjust is a pair of strong, nylon ropes complete with hooks and adjusting tabs for suspending light fixtures in the tent.

	Retail	Catalogue No.

Mammoth – Support Pole

Extra support pole for your Mammoth tent if required.

	Retail	Catalogue No.
Mammoth - Support Pole (2 metre)	\$16.00	MSP

Substrates, Pots & Trays

Geopot

Geopot is a breathable fabric plant container that air prunes your roots when they reach the edge of the container. This air root pruning process forces your roots to branch out with more fibrous feeder roots, which are more efficient in taking up water and nutrients. The porous fabric allows air into the root zone and provides great drainage, creating a healthy environment for the roots.

GeoPlanters

With traditional plastic pots and wooden planters, the plant's roots will reach the edge of the container and be forced to circle the container in search of a friendlier environment. As these roots circle, minimal lateral branching will occur resulting in poor nutrient uptake and the roots to quickly become root bound. What makes the GeoPlanter so unique is when the plant roots reach the container's edge its root tips are trapped by the porous fabric and these root tips meet the air on the outside of the pot, causing them to be naturally pruned. This pruning process forces lateral branching of desired fibrous feeder roots. These fibrous roots are more productive in the uptake of water and nutrient, resulting in a more vigorous and healthy plant that utilizes the entire root zone for optimum plant growth.

Gold Label – Coco

Gold Label Coco is manufactured using the fibres from the husk of the coconut. Only matured woody brown husk is used for optimum quality and stability of the substrate. The husk fibres are washed to remove excess EC, buffered to remove potassium and then sieved into fine fibres. All the processing is done in an environmentally friendly way under supervision of the RHP authority. Gold Label Coco is RHP Horticulture certified thus ensuring quality, stability and crop safety. Mineral as well as organic nutrients can be used with this fully organic, recyclable top quality substrate. The light weight makes it easy to handle and process.

Gold Label – Hydrocorn

Gold Label Hydrocorn (clay pebbles) are manufactured using a mix of the best quality pure clays and are baked in an open furnace using high grade clean fuels, guaranteeing the absence of heavy metals or other contaminants. Gold Label Hydrocorn proudly carries the RHP for horticulture quality certificate. Gold Label Hydrocorn is the inert hydroponics substrate of choice for professionals. The 8-16mm size provides stability and the unique uneven shape of the pebble is an ideal surface for roots and beneficial bacteria. The porous structure has a high water capacity and is suitable for both ebb/flood and top irrigation systems. Gold Label Hydrocorn is also available in 4-8mm and 16-25mm.

Gold Label – HydroCoco 60/40 Mix

Gold Label Hydrocorn and Coco is an ideal match for high water capacity, lower watering frequency and better rooting. We utilise the 8-16mm Hydrocorn from Gold Label and the purest Gold Label Coco to give you the perfect ebb and flood growing media which also works well in any pot based systems. The 60/40 mix allows you to feed less frequently than in straight Hydrocorn and gives a buffer on the watering times.

G-Pots

G-Pots are the first dedicated drainage trays designed specifically for Geopots or any brand of air pruning pot (fabric or plastic). G-Pots have multiple formats of use, provide exceptional value and offer design features like no other drain tray. G-Pot's unique tapered design allows maximum air exposure to the entire air pruning pot. G-Pots include a flat, dedicated panel that can be drilled to accommodate 13mm, 19mm & 25mm poly fittings. G-Pots come in two sizes, 480mm (up to 38L/10Gal) and 550mm (up to 76L/20Gal). Both sizes are 150mm/6" high and provide ample volume for drainage and controlled medium flushing. G-Pots can be used by themselves or with a Pot Grid insert for increased drainage and air exposure. G-Pots lock together to form a stable pot stand and drain tray system. G-Pots provide the complete potting solution with the addition of the interlocking trellis (SCROG) kit. With G-Pots the choice is yours.

Features:

- G-Pots stack together tightly for maximum shipping efficiency.
- G-Pots can be used by themselves to drain your favourite air pruning pot.
- Insert Pot Grids to increase drainage in low lying areas (extra 60mm above floor level).
- Interlock two G-Pots for pot stand and drain tray combined (150mm above floor level).
- Complete G-Pot kit includes the sturdiest and most versatile trellis netting system to date.
- Exceptional strength (up to 150kg load), quality, versatility and value for money.

Air Filtration

Phresh – Filters

Phresh Filters are world renowned as the very best carbon filter canister available. Using only sieved and de-dusted Australian activated carbon, every batch is analysed and tested to ensure it meets 950ID or higher. All carbon particle sizes are 4/12 US mesh or larger, ensuring the highest achievable airflow ratings. Every canister is weighed after manufacture to ensure consistency with every single filter made. Expect a minimum of 2 years life and up to five years life span in low humidity environments.

Fans & Accessories

Phresh – HyperFans *Hyperfan™*

Hyperfans use EC powered, 12 pole, brushless digital motors and have the lowest energy use of any compatible fan. Hyperfans have the highest pressure output of any fan currently available (up to 600Pa.Ps) which makes them perfect for use on carbon filters, long ducting lengths and high pressure applications. A speed controller on a dedicated 5m cable is included with every HyperFan. HyperFans are fully speed controllable without droning or risk of motor damage and have a five year warranty.

	m ³ /h	Retail	Cat. No.	Max. room size/watts

Phresh – Hyper Climate Control *Hyperfan™*

The all new Hyper Climate Control is designed to thermostatically adjust air-flow (via variable fan speed) into your grow space on both warm days and cold nights. As cold air can be detrimental to plant health during night cycles, the Hyper Climate Control drops fan RPM's down to a minimum to keep the plants warmer and maintain just enough airflow for effective carbon filter operation. During warmer daytime temperatures the Hyper Climate Control will lift and regulate fan RPM's to maintain your digitally selected maximum ambient temperature. Set two dials once only at the beginning of each cycle and forget!

Adjust-A-Wings 315W e-Ballast

Adjust-A-Wings specialist Ultra High Frequency (150KHz) 315W e-ballast was designed specifically for remote use (out of room mounting) and long lamp holder cords (up to 5m long). It fires both the 3K and 4K 315W lamps remotely & effortlessly due to the use of high frequency Hertz output (instead of low frequency square waves that all other manufacturers use). The Adjust-A-Wings e-Ballast operates all 315W lamp types but is frequency tuned to best operate most effectively with Adjust-A-Wings 3200 & 4200K 315W lamps.

	Retail	Catalogue No.
315W e-ballast	\$299.00	AW315B

Digi-Lumen 600W e-Ballast

Digi-Lumen 4D dimmable ballasts are the latest generation of digital ballasts. Clever engineering makes for cost effective and electrically stable ballasts that are suitable for harsh conditions and high voltage power grids. Digi-Lumen ballasts come with the ability to change the power output to four unique settings. This offers a complete plant lighting solution from one light kit including seed & clone mode (250W), vegetative & power save mode (400W), flower mode (600W) and Super-Lumens mode for extreme flowering on cooler days (660W). Simply dim the ballast if temperatures get too high and turn it back up when they cool. Digi-Lumen ballasts will operate both MH and HPS 600W Single Ended lamps.

	Retail	Catalogue No.

CHM 315W 4K Retro kit	\$439.00	AW315RKIT4

E40 mogul base

Adjust-A-Wings CMH 315W Kit (4200K)

High intensity, high reliability and unrivalled spectral output. The Adjust-A-Wings 315W CMH light kit includes a class leading 4200K Ceramic Metal Halide (CMH) lamp with bespoke Japanese arc tube and XOS borosilicate jacket. Perfectly matched to the specialist Ultra High Frequency (150KHz) remote-ballast which ensures effortless, reliable ignition of both the 3100K and 4200K lamps. Ideal for small grow spaces (1m x 1m footprint) and for blending with HPS lamps to provide complete spectral diversity. Key grower benefits include: remote ballast for out of room mounting and heat reduction. Adjust-A-Wing Defender's proven open-end design allows for closer lamp placement. Ultra-light weight fixture for ease of mounting, deeper canopy penetration, explosive growth rates, shorter internodal length and increased terpene/essential oil production.

Use: All stages of growth and flower.

- 315W 4200K lamp with E40 mogul base

Adjust-A-Wings – 630W CMH Kits

High intensity, high reliability and unrivaled spectral output. The Adjust-A-Wings 630W CMH light kit comes with a double jacket, double ended 3100K lamp which incorporates bespoke Japanese arc tubes and crystal quartz glass jackets. Lamps have been matched perfectly to the specialist Square Wave low frequency e-ballast. Ideal for medium grow spaces (1.2m x 1.2m up to 1.8m x 1.2m footprint) and for mixing between HPS lamps to provide complete spectral diversity (CRI of 84). Key grower benefits include:

- Remote ballast or reflector mounted options.
- Super Spreader and reflector connector included
- Closer lamp placement
- Deeper canopy penetration,
- Explosive growth & shorter internodal length
- Increased terpene/essential oil production.

Use: All stages of growth and flower.

Adjust-A-Wings 600-750W Hellion Kit

The Hellion 600/750 Light Kit is the first complete light kit to come from Adjust-A-Wings. The Hellion 400V ballast and 600/750 DE Lamp have been frequency tuned & matched for harmonic perfection. The Hellion Light Kits run flawlessly at either 450W, 600W & 750W settings (Maximum output of 1500 umol). Every kit includes a super spreader, making it the first DE light kit ever made that can operate 45cm above the plant canopy without leaf burn (suitable for use in 2m high tents and low ceiling applications).

There are 2 hanging options: for commercial applications, hang your lamp ballast and reflector together as a complete fixture, or to save space, keep your ballast outside your grow room.

Each kit contains:

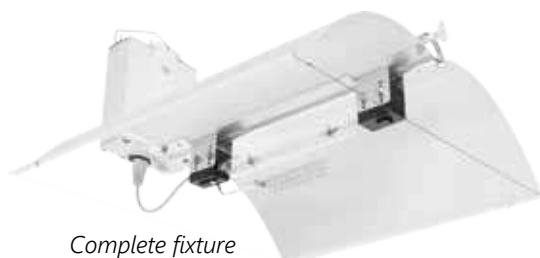

- 1 x 600-750W digital Ballast
- 1 x Medium Defender shade
- 1 x Hellion DE Lamp Holder
- 1 x 600-750W DE lamp
- 1 x Super Spreader
- 1 x Reflector Connector (Complete Fixture Only).

Ballasts, Light Kits & Controllers

Gavita – Pro Line / Classic

Gavita are the innovators of double ended lighting. As our electronic ballasts only dissipate very little heat there is no reason why you shouldn't install complete fixtures in your grow room. Long wires from remote high frequency electronic ballasts to lamps can cause electromagnetic interference. Using complete fixtures eliminates any EMI caused by electronic ballasts and enables easy multiple fixture installation.

	Retail	Catalogue No.
600W SE – 240/400V	\$850.00	GPLC6
1000W DE – 240/400V	\$1050.00	GPLC1

Gavita – Pro Line / E Series

The new Gavita Pro Line E Series complete fixtures are next generation professional grow light solutions. Using high-output, high frequency lamps, the e-series ballasts are now capable of being remote controlled by the Gavita Master Controller.

	Retail	Catalogue No.
600W SE – 240/400V	\$900.00	GPL6E
750W DE – 240/400V	\$970.00	GPL75E
1000W DE – 240/400V	\$1100.00	GPL1E

Gavita – Plasma

The Gavita Pro 270e LEP is a plasma light fixture based on the LUXIM Light Emitting Plasma (LEP) technology. It is completely solid state (no moving parts) and suitable for climate rooms (damp environments). They are suitable for central control with the Gavita Master Lighting Controllers. Now you can have complete lighting control at your fingertips. The LEP technology is based on a radio frequency driver which excites an emitter cell without electrodes. The molecules in the emitter transform into plasma state, emitting an intense full continuous spectrum light.

	Retail	Catalogue No.
270 LEP E Series (supplemental 41.01)	\$1880.00	GAVP270E
270 LEP E Series Grow (full spectrum grow)	\$1880.00	GP270G

Ballasts, Light Kits & Controllers

Gavita - Master Controller (Gen 2 / F series)

The new Gavita ELF controllers (F is for fan) raise the bar in controller functionality and reliability. Both EL1F & EL2F feature a new non-volatile battery back up (72 hours memory hold). Both channels on the EL2F are now fully independent which allows both a grow phase (18/6) and a flowering phase (12/12) to operate simultaneously off the one controller. The added feature of data logging records major events when your not there such as power failures or auto shutdown events. All other functions such as sunrise/sunset, auto dim and auto shut down are still standard. The new Intelligent PID fan control function for 0-10V EC fans is self-learning and self-stabilising; which greatly reduces room temperature fluctuations. An external fan balancer module (FB1) is also available and (recommended) so inlet and outlet pressure can be adjusted to each individual application.

	Retail	Catalogue No.
EL1F	\$725.00	GAVMC1F
EL2F	\$895.00	GAVMC2F

Gavita – External Fan Balancer

Filters, fan size and ducting greatly influence the air flow in all extraction systems, sometimes leading to over-pressure in your room. With the Fan Balancer you can offset either your intake or extraction fan, to provide perfect balance between the two air flows.

	Retail	Catalogue No.
FB1	\$179.00	GAVFB1

Gavita – External Contactor Module

The Gavita Master Controller EL2 has two outputs for optional External Contactor Modules (ECMs). These industry grade contactor units can switch a load up to 15 amps of accessories during either lights on or lights off period. Using the ECMs you can switch, for example, your humidifier, heating, CO₂ equipment and watering systems. As the ECMs are steered by a low voltage signal you can even locate them close to the accessories themselves, enabling easy installation and optimal flexibility.

	Retail	Catalogue No.
ECM	\$179.00	GECEM

Gavita – Extension Cables

Extension cable for E Series lights 'fixture to fixture' only.

	Retail	Catalogue No.
3m Extension cable (RJ14 to RJ14)	\$45.00	GEXT

Ballasts, Light Kits & Controllers

Gavita – 3 Way RJ-14 Cable Splitter

3 Way splitter junction used for 'daisy chain' installation of multiple E Series light fixtures.

	Retail	Catalogue No.
3 Way Splitter (RJ14 to RJ14)	\$45.00	GCS

Gavita - Temperature Probe (spare)

Five metre replacement temperature probe.

	Retail	Catalogue No.
5m Temperature Probe	\$60.00	GTP

SolisTek – Digital Splitter

Solis Splitters are designed to run two 600W lamps from one 1000W digital ballast. The idea is to run one 600W HPS and one 600W MH lamp together to supply a more balanced light spectrum than either lamp can provide on their own. 1000W ballast must run on boost function (1100W) at all times for the splitter to operate both 600W lamps correctly. Digital lamps are recommended (Pro Grow Digital Lamps).

	Retail	Catalogue No.
Digital Lamp splitter	\$70.00	STKDS

Reflectors & Light Spreaders

Gavita – Replacement Reflectors

As heat from the lamp depreciates the mylar/anodised silver reflectivity at 5% per annum, it is advised to replace your reflector every year to maintain optimal reflector light output.

	Retail	Catalogue No.
600W SE	\$75.00	GHR966SE
750/1000W DE	\$75.00	GHR961DE

Gavita – Small Room Reflectors

The most successful commercial lighting company in the world now brings Gavita lighting into your small room area. The new Gavita G-110 SR reflector emits a perfect 110 x 118cm blanket of light to the plant canopy, matching perfectly with the Mammoth G1 & G2 HC tent dimensions. G-110 SR reflectors clip straight into your existing Gavita fixture in seconds. Make the most of your valuable space & grow like a pro!

Medium (with mogul clip)	\$20.00	AWESSMC
Large (with mogul clip)	\$25.00	AWESSLC

With mogul clip

Adjust-A-Wings – Reflector Connector

Hang your Adjust-A-Wings Hellion, ballast and reflector together as a complete commercial fixture (Adjust-A-Wings brand compatible only).

	Retail	Catalogue No.
Reflector Connector	\$35.00	AWRC

Lamps & Globes

Hellion – 315W CMH Single Ended Lamps

Adjust-A-Wings Hellion raises the bar with the introduction of two new 315W Ceramic Metal Halide lamps (3100K & 4200K). Both utilise bespoke Japanese arc tubes and are fitted with industry standard E40 mogul bases for versatility and improved reliability (fits any standard reflector). The use of XOS borosilicate glass jackets further enhances harmonic stability, cooler lamp operation and extended lamp life at over 10,000 hours (one-year warranty). When tested in an integrating sphere the 4200K lamp showed a 7.5% increase in output over the industry leading lamp (tests available upon request). The 3100K lamp will maintain its PPF intensity far longer than any other 3000K 315W lamp currently available for consistently higher yields over its two-year lamp life.

	Retail	Catalogue No.
CMH 315W 3100K Lamp	\$169.00	AW3153K
CMH 315W 4200K Lamp	\$169.00	AW3154K

Hellion – 600/750 HPS Double Ended Lamp

Adjust-A-Wings Hellion DE HPS Digital Lamps equal or exceed the output of the worlds best DE HPS lamps while offering up-rated components specifically tuned for use with high frequency digital ballasts. Up to 24% more output than a single ended equivalent.

Pro Grow – HPS Single Ended Lamps

The new Pro Grow HPS 620W & 1000W single ended lamps exceed the output of even the best European branded lamps. All Pro Grow lamps offer up-rated components specifically tuned for use with high frequency digital ballasts. Improvements include monolithic arc tube construction, more robust frame wire material, extruded ceramic ark tubes (not molded) decreased frame wire thickness (for reduced shadow print) and low iron glass for enhanced UV penetration. Grow like a pro at half the price of equivalent Euro branded lamps (virtually all lamp brands are now manufactured in China).

	Retail	Catalogue No.
620W HPS 2K	\$50.00	PG620/2
1000W SE HPS 2K	\$115.00	PG1000/2

Disclaimer

Please be advised that upon purchasing any of the following catalogue items Cloud Cave Pty Ltd and WHG.net accept no responsibility for any improper handling, misuse, illegal or unsafe storage of these products Extraction, Puretane, Rosin Presses, Silicone, Centurion Trimmers, Vape Kits / Spares, E-njoint, Integra, Bulldog, Revelry and Across International.

Please be advised that upon purchasing Across International®, Cloud Cave Pty Ltd and WHG.net accept no responsibility for any improper handling, misuse, illegal or unsafe storage of this product.

Warranties:

Our products are warranted to be free from defects in materials or workmanship for one year from the date of purchase (original invoice date). Within this period, Across International Australia will, at its sole options, replace any components that fail in normal use. Such replacement will be made at no charge to the customer for parts or shipping. Note: This warranty does not cover failures due to abuse, misuse, accident, unauthorized alteration or repairs or consumable products such as (but not limited to) grinding media, quartz and alumina tubes, crucibles, heating elements, and thermocouples. Some items have additional warranty available for purchase.

Please call us or contact us at info@acrossinternational.com.au for more information.

Return Policy:

By placing an order with Across International Australia either online or via phone, you indicate that you have read and agree to the following return policies.

Note: Returns must meet **ALL** criteria.

We do not accept returns for customized items. Across International Australia in its sole and absolute discretion shall be the sole determiner of whether a product is in fact defective.

1. Starting from the date of delivery, you will have 10 calendar days to open and inspect all crates/boxes. Any missing pieces must be reported during this time period, otherwise Across International will not be held responsible. If anything is missing, please contact us.
2. You have 30 calendar days from the date your shipment was delivered to get a valid return merchandise authorization (RMA) number and return the goods to the possession of Across International Australia. If the item is returned during this timeframe, we will exchange it or offer a refund based upon the original payment method. For products verified to be defective, Across International Australia will supply a prepaid shipping label along with an RMA number.
3. Products should be returned unused and in the original condition they were received. This includes all accessories, manuals, manufacturer's crate/boxes, packing materials, etc. Returns received that have been used or with missing components or modifications will be refused and returned to you at your cost and without credit approval. You will be responsible to ensure adequate packaging on all return shipments. If the shipment is damaged in transit to Across International Australia, you will be responsible for the loss of any non-defective items.
4. For non-defective products, a 15% restocking fee will apply and you will be responsible for the cost of the initial shipment and return shipment. For products verified to be defective, Across International Australia will be responsible for your return shipment and the shipment of replacement items.

Cloud Cave – Extraction

28Gram & 56Gram 304 Stainless Steel Open Extraction Chamber

Traditional Open Extractor: Simple and fast, the Solvent Can will fit into the top cap hole. Approximately 1 Can per 28g of material.

Kit Includes:

- Platinum Cure Silicone Non-Stick Pad
- 304 Stainless Steel Material Tube
- 304 Stainless Steel Top Cap with 3mm Hole (fits most solvent can tips)
- 304 Stainless Tri-Clamp Ferrule
- 1 x Tri-Clamp Quad pod 1.5"
- 1 x Gasket 1.5"
- 1 x 150micron Mesh Gasket 1.5"

	Retail	Catalogue No.
6" Open Extraction Chamber	\$160.00	EXT001
12" Open Extraction Chamber	\$200.00	EXT002

56Gram 304 Stainless Steel Closed Column Extractor

The 12" Pressurized Closed Column extractor consists of an easy to work design and allows you to shut of the valves and soak the material. This process produces increased yields but also provides increased control and safety.

Kit Includes:

- Platinum Cure Silicone Non-Stick Pad
- 304 Stainless Steel Material Tube
- 304 Stainless Steel Barb/Flare End Caps with Heavy Duty Miniature Ball Valves
- 304 Stainless Tri-Clamp Ferrule
- 1 x 3mm Drain Plug
- 1 x Viton Gasket 1.5"
- 1 x Viton 150micron Mesh Gasket 1.5"
- 1 x Tri-Clamp Quad pod 1.5"

	Retail	Catalogue No.
12" Closed Column Extractor	\$300.00	EXT004

Cloud Cave – Extraction

180Gram 304 Stainless Steel Closed Column Extractor with De-wax Column

- Platinum Cure Silicone Non-Stick Pad
- 304 Stainless Steel Material Tube
- 304 Stainless Steel Barb/Flare End Caps with Heavy Duty Miniature Ball Valves
- 304 Stainless Tri-Clamp Ferrule
- 1 x 1/4" Drain Plug
- 1 x Gasket 1.5"
- 1 x 150micron Mesh Gasket 1.5"
- 1 x Hemispherical Reducer
- 1 x Tri-Clamp Quad pod 1.5"

	Retail	Catalogue No.
180 Gram Extractor with De-wax Column	\$850.00	EXT032

450Gram 304 Stainless Steel Closed Column Extractor with De-wax Column

- Platinum Cure Silicone Non-Stick Pad
- 304 Stainless Steel Material Tube
- 304 Stainless Steel Barb/Flare End Caps with Heavy Duty Miniature Ball Valves
- 304 Stainless Tri-Clamp Ferrule
- 1 x 1/4" Drain Plug
- 1 x Gasket 1.5"
- 1 x 150micron Mesh Gasket 1.5"
- 1 x Hemispherical Reducer
- 1 x Tri-Clamp Quad pod 1.5"

	Retail	Catalogue No.
450 Gram Extractor with De-wax Column	\$1,020.00	EXT033

Shower Head with Pressure Gauge (For 180-450Gram Units)

304 Stainless Steel 3" Flare end cap w/ Shower Head and Pressure, Ball Valve.
Gauge 0-10bar 0-140psi

	Retail	Catalogue No.
Shower Head with Pressure Gauge	\$250.00	EXT034

2.5Lb Closed Loop Reclaim Extraction System

Kit Includes:

- All components are made of 304 Stainless Steel
- High Polish interior
- 2.5Lb Material Column
- Bottom Fill Port with 2" Ball Valve
- 25Lb Solvent Reclaim Tank (Isobutane Storage)
- 2" Sight Glass Port
- Filter Assembly Plates (for cleaner runs)
- 150PSI Pressure Gauge
- 150PSI Brass Pressure Relief Valves
- Max Vacuum -29.9inHg
- Braided Stainless PTFE Hose
- Viton Gaskets
- High Pressure Clamps at all interfaces
- Easy Disassembly for cleaning
- Splatter Platter with Fluid Jacket for water recirculation bath.

	Retail	Catalogue No.
2.5Lb Closed Loop Reclaim Extraction System	\$6000.00	SSBD001

5Lb Inline Closed Loop Reclaim Extraction System

Kit Includes:

- All components are made of 304 Stainless Steel
- High Polish interior
- 1x 2.5Lb Material Column
- 1x 2.5Lb De-Wax Material Column (helps remove fats and waxes)
- 25Lb Solvent Reclaim Tank (Isobutane Storage)
- 2" Sight Glass Port
- Filter assembly plates (for cleaner runs)
- 150PSI Pressure Gauge
- 150PSI Brass Pressure Relief Valves
- Max Vacuum -29.9inHg
- Braided Stainless PTFE Hose
- Viton Gaskets
- High Pressure Clamps at all interfaces
- Easy Disassembly for cleaning.
- Splatter Platter with Fluid Jacket for water recirculation bath.
- Base taps on both material columns for easy pour.

	Retail	Catalogue No.
5Lb Inline Closed Loop Reclaim Extraction System	\$10,000.00	SSBD002

Molecular Sieve (For Closed Loop Reclaim Systems)

To be run with Vacuum Recovery Pump for safe and dry recovery of Natural gases.

Kit Includes:

- 1/4" Ball Valves
- 3" High Pressure Tri-Clamps
- 3x12" Sanitary Tri-Clamp Spool
- 150micron Mesh Viton Gaskets
- 3" Rounded end Caps

	Retail	Catalogue No.
Molecular Sieve (For Closed Loop Reclaim Systems)	\$600.00	SSBD003

3A Molecular Beads

Refill Bags of 3A Beads for Molecular Sieve.

	Retail	Catalogue No.
3A Molecular Beads (Bag)	\$45.00	SSBD004

Condensing Coil (For Closed Loop Reclaim Systems)

For the cooling of gas before collecting in Recovery Tank. To be run with Recovery Vacuum Pump.

Kit Includes:

- 1/4" Male SAE Bulkhead
- 1/4" Ball Valve
- 150 PSI Pressure Gauge
- 3/8" x 50" Length condensing coil/wort chiller

	Retail	Catalogue No.
Condensing Coil (For Closed Loop Reclaim Systems)	\$1900.00	SSBD005

Cloud Cave – Extraction

Rainer 10lb Inline Dewax Extractor

Open Source Steel's most popular extractor! Great for making sauce, running crude, fresh frozen and more. Get this game changing system today and experience why Open Source Steel builds the best.

Now with an optional one of a kind Hardline Manifold (pictures coming soon!) Reducing the tangle of hoses and hose configurations into one manifold, giving complete control over the flow of the solvent throughout the entire system.

Specifications:

- 5-10lb material capacity
- In-line Dry ice de-wax vessel removes fats and waxes to help facilitate only the best extracts
- Multiple hose configurations for bulk runs or smaller de-wax runs
- Modular rack and mounting brackets to adapt and expand with your business needs
- Large 12" collection vessel for max capacity
- Round Bottom Jacketed Base designed for hot water recirculation for speedy recovery
- Pour Spout designed for quick and painless pour outs
- 50lb Stainless Steel Solvent Tank
- Dual Recovery lines for decreasing recovery times and increasing throughput

	Retail	Catalogue No.
Rainer 10lb Inline Dewax Extractor	\$14999.00	OSS003

Nucleus Refiner

The Nucleus, refining your extract into sauce has never been easier. Multiple views let you easily monitor crystal growth. 4" x 2" Shatter Platter to easily remove your crystals. 3/8" Full Port Ball Valve allows for easy burping and the 3/8" 150psi Pressure Relief Valve adds an extra level of safety. 150psi Compound gauge to monitor your pressure (thread tape required for assembly).

	Retail	Catalogue No.
Nucleus Refiner	\$999.00	OSS001

Stainless Steel 1.5Gal/ 5.5Litre Vacuum Kit

This chamber is sure to last 10,000 uses with proper care and maintenance.

Includes:

- 1 x 1.5 Gallon high strength Stainless Steel Chamber
- 1 x Industrial grade silicone gasket
- Gasket can withstand 39°F max temp.
- 60A durometer density
- 1 x Glycerin filled vacuum gauge (must be regulated upon arrival)
- Max vacuum -29Hg (+/- .5Hg) at sea level
- 1 x Leak free nickel plated air manifold
- Vacuum release valve and vacuum connect valve
- 1 x 1/4" Female flare universal pump adapter for vacuum hose
- 1 x 5ft clear steel reinforced vacuum hose
- 1 x 8"x 8" Platinum cured silicone non-stick VacPad®
- 1 x 50micron air filter

Specifications:

Internal Dimensions: 8-5/8" Tall x 7-1/8" Diameter

	Retail	Catalogue No.
Stainless Steel 1.5gal Vacuum Kit	\$350.00	EXT020

Pyrex 2.2Litre Vacuum Kit

Kit Includes:

- 1 x Soda lime triple tempered glass bowl
- 1 x Industrial Grade Neoprene Gasket
- 1 x Glycerin filled vacuum gauge (must be regulated upon arrival)
- Max vacuum -29Hg (+/- .5Hg) at sea level
- 1 x Leak free nickel plated air manifold
- Vacuum release valve and vacuum connect valve
- 1 x 1/4" Female flare universal pump adapter for vacuum hose
- 1 x 5ft clear steel reinforced vacuum hose
- 1 x 8"x8" Platinum cured silicone non-stick VacPad®
- 1 x 50micron air filter

Cloud Cave – Vacuum Chambers / Ovens

220V 25L Vacuum Oven 5 Sided Heat, SST Tubing/Valves

Intro vacuum oven. Comes standard with all stainless steel tubing/compression fittings, stainless steel vacuum/vent valve, oil-filled vacuum gauge, 5 sided pad heating technology and two year warranty. The thermal-conductive aluminium pan shelves provide excellent temperature uniformity inside the chamber, while our 3rd gen LCD low proportional gain temperature controllers keep your oven temperature within +/- 1°F accuracy, in either °F or °C.

AccuTemp-09 series digital desktop vacuum ovens feature a 25L easy-to-clean stainless steel chamber with a large dual-layer tempered glass safety window and small footprint. These ovens can greatly reduce drying time by maintaining a consistent vacuum level within the chamber.

Every one of our vacuum ovens goes through a 2-time, 24-hour vacuum leak test and is 100% quality controlled in New Jersey or Nevada before leaving their facilities.

Attention:

Before initial use, run oven at 400°F without vacuum for 15 minutes to burn off any residue that may have been introduced during the manufacturing process.

IMPORTANT! NEVER LEAVE YOUR OVEN UNATTENDED WHILE OPERATING. Across International is not responsible for any loss of material inside of the oven.

	Retail	Catalogue No.

Cloud Cave – Vacuum Pumps

Ai Automatic Vacuum Controller with Digital Vacuum Gauge

The Ai AutoVac gives you the ability to set your desired vacuum levels and let it take care of the rest. Designed by Ai and built 100% in the USA, AutoVac is used to monitor vacuum level on your systems or vacuum ovens, when the digital gauge is programmed to the desired vacuum level, the system activates and will enable the valve to be open and provide power to the outlet connector which connects to your vacuum pump.

AutoVac will extend your vacuum pump and filter's life dramatically by turning it on only when necessary, it also keeps pumps from overheating, cuts unnecessary pump noise and lowers your monthly utility bill. Comes with a one year warranty and lifetime support from Ai.

Important! If you are using the AutoVac with a rotary evaporator and a pump, please connect your pump to the wall outlet instead of plugging it to the back of the AutoVac.

	Retail	Catalogue No.
Ai Automatic Vacuum Controller with Digital Vacuum Gauge	\$1,826.00	AI AVC

ULVAC DTC-41 1.6 CFM Dual-Stage Chemical-Duty Diaphragm Pump

Manufactured and imported directly from Japan, ULVAC DTC series diaphragm pumps feature integral forced-air cooling. They have two-stage PTFE diaphragms that are ideal for pumping corrosive gases and organic solvents. These pumps are oil-free, portable and chemical-resistant, which means less maintenance and no more frequent and costly oil change or cross contamination.

Ai is now the official dealer of ULVAC vacuum pumps. These pumps are made in Japan with one year warranty and technical support from ULVAC.

Features:

- Only PTFE components are exposed to vacuum, ideal for pumping corrosive gases and organic solvents
- Integral forced-air cooling
- Very compact and portable
- Designed to back most hybrid turbo pumps

Applications:

- Rotary evaporator
- Evaporating system
- Vacuum concentrator
- Vacuum filtration
- Vacuum drying systems
- Medical/pharmaceutical equipment
- Centrifuge
- Laser-gas circulation

BVV 3CFM Basic Vacuum Pump Kit

The perfect Vacuum Pump for use with Vacuum chambers under 5L capacity. Suits both the Stainless and Pyrex Vacuum Kits.

Includes:

- 50RPM at 60Hz
- 180W Power output
- 110-240V Compatible
- Vacuum as low as 50 micron
- Overload Thermal Protection
- 250mL Oil Capacity
- 6 month Limited Warranty

Welch 1400 DuoSeal 0.9 cfm 0.1 Micron Belt Drive Dual-Stage Pump

The Welch DuoSeal vacuum pumps are known for their ruggedness world-wide. These pumps have large oil reservoirs to dilute contaminants. Low pump rpm to reduces friction and wear while minimizing reservoir temperature to lessen chemical reactivity.

The Welch 1400 DuoSeal belt drive rotary vane is a durable vacuum pump with a superior vapor handling capability. It offers an excellent ultimate pressure of 1×10^{-4} torr. These pumps are commonly used for vacuum furnace evacuation, backing turbomolecular pumps, backing diffusion pumps, rotary evaporation, refrigeration system evacuation, epoxy degassing, vacuum sterilization, backing mass spectrometers, freeze drying, vacuum centrifugal applications, vacuum distillation, space research, and other vacuum processes. These Welch 1400 DuoSeal Belt Drive Pumps have a pumping speed displacement of 0.9 CFM.

10ft Roll of High Temperature Food Grade Silicone Vacuum Tubing

Looking for rubber tubing that can take the heat? Silicone is a synthetic rubber that's more resilient than natural rubber, making it a popular choice for vacuum pumps. Tubing won't impart taste or odours and maintains its flexibility over time. Use with water, air, and food and beverage. Tubing is made from FDA-compliant resins. Material meets ASTM D2000. Tubing can be sterilized with steam (autoclaving) and radiation. - Temperature Range: -94°F to 392°F - Use with barbed fittings

	Retail	Catalogue No.
10ft Roll of High Temperature Food Grade Silicone Vacuum Tubing	\$79.80	AISVT10

Butane Leak Detector

State-of-art microprocessor. These units detect leaks fast and accurately. The membrane switch panel offers easy one touch control and operation. Each of the six levels of sensitivity has an audible alarm and visual indicator to identify leak activity.

Six Sensitivity Levels

- Automatic Warm Up
- Audible Leak Alarm & Visual Leak Size Indicator
- Rechargeable Ni-MH Battery
- Low Battery Indicator

Detects:

Acetone, Acetylene, Ammonia, Benzene, Butane, Butanol, Chlorine, Ethane, Ethanol, Gasoline, Hexane, Hydrogen, Hydrogen Sulfide, Isobutane, Methane (natural gas), Methanol, Methyl Acetate, Methyl Chloride, Methyl Ether, Naptha, N-Butane, Pentane, Propane, Propanol, Sulfur Dioxide and Trichloroethane.

	Retail	Catalogue No.
Butane Leak Detector	\$380.00	EXT015

Butane Levels Monitor + Alarm

Product features:

- Handheld, industry use, high sensitivity and accuracy
- Intrinsically safe.
- Rugged ABS+PC case, heavy duty, crash resistant
- High-capacity chip, 4 layers PCB board
- Visual & audible alarm
- Low battery alarm
- Charging dock, easier access to recharging
- Energy saving LED screen shows real time concentration
- External air sampling pump is available for gas leak detection
- Leather case is provided

Usage:

CE approval, portable combustible gas detector, portable butane detector, C4H10 detector. The gas detection instruments we designed are widely used in petrochemical, municipal environmental protection, coal mine, residential places, and other natural and wide ranges of industrial environments.

Technical Parameter:

CE approval, portable combustible gas detector, portable butane detector, C4H10 detector
Gas detected Butane (C4H10) Measuring range (0-100)%LEL

Cloud Cave – Across International

Across International

Please be advised that upon purchasing Across International®, Cloud Cave Pty Ltd and WHG.net accept no responsibility for any improper handling, misuse, illegal or unsafe storage of this product.

Warranties:

Our products are warranted to be free from defects in materials or workmanship for one year from the date of purchase (original invoice date). Within this period, Across International Australia will, at its sole options, replace any components that fail in normal use. Such replacement will be made at no charge to the customer for parts or shipping.

Note: This warranty does not cover failures due to abuse, misuse, accident, unauthorized alteration or repairs or consumable products such as (but not limited to) grinding media, quartz and alumina tubes, crucibles, heating elements, and thermocouples.

Some items have additional warranty available for purchase.

Please call us or contact us at info@acrossinternational.com.au for more information.

Return Policy:

By placing an order with Across International Australia either online or via phone, you indicate that you have read and agree to the following return policies.

Note: Returns must meet **ALL** criteria.

We do not accept returns for customized items. Across International Australia in its sole and absolute discretion shall be the sole determiner of whether a product is in fact defective.

1. Starting from the date of delivery, you will have 10 calendar days to open and inspect all crates/boxes. Any missing pieces must be reported during this time period, otherwise Across International will not be held responsible. If anything is missing, please contact us.
2. You have 30 calendar days from the date your shipment was delivered to get a valid return merchandise authorization (RMA) number and return the goods to the possession of Across International Australia. If the item is returned during this timeframe, we will exchange it or offer a refund based upon the original payment method. For products verified to be defective, Across International Australia will supply a prepaid shipping label along with an RMA number.
3. Products should be returned unused and in the original condition they were received. This includes all accessories, manuals, manufacturer's crate/boxes, packing materials, etc. Returns received that have been used or with missing components or modifications will be refused and returned to you at your cost and without credit approval. You will be responsible to ensure adequate packaging on all return shipments. If the shipment is damaged in transit to Across International Australia, you will be responsible for the loss of any non-defective items.
4. For non-defective products, a 15% restocking fee will apply and you will be responsible for the cost of the initial shipment and return shipment. For products verified to be defective, Across International Australia will be responsible for your return shipment and the shipment of replacement items.

Ai DigiM 2L 300°C 1500RPM PID Controlled Digital Heating Mantle

Across International heating and stirring mantles come standard with digital display for the most accurate control. The large display interface makes it easy to quickly and precisely adjust temperature and rotation speeds. The DigiM mantle is equipped with two sets of thermocouples for proper temperature and speed detection. The heating jacket is pre-treated before shipment, which ensures that no smoke or odours (caused by heat) are released into your work environment.

	Retail	Catalogue No.
Ai DigiM 2L 300°C 1500RPM PID Controlled Digital Heating Mantle	\$1,076.80	AIDHM

Ai T1 Glass Vacuum Cold Trap for Safe Vacuum Operations

In vacuum applications, a cold trap is a device that condenses all vapors except the permanent gases into a liquid or solid. The most common objective is to prevent vapors being evacuated from an experiment from entering a vacuum pump where they would condense and contaminate it. Particularly large cold traps are necessary when removing large amounts of liquid as in freeze drying.

Pumps that use oil either as their working fluid (diffusion pumps), or as their lubricant (mechanical rotary pumps), are often the sources of contamination in vacuum systems. Placing a cold trap at the mouth of such a pump greatly lowers the risk that oil vapors will back stream into the vacuum cavity.

Care should be taken when using a cold trap not to condense liquid oxygen (a light blue liquid) into the cold trap. Liquid oxygen is potentially explosive, and this is especially true if the trap has been used to trap solvent. Liquid oxygen can be condensed into a cold trap if a pump has sucked air through the trap when the trap is very cold.

Features:

- Utilizes dry ice for optimal efficiency
- Comes with scissor jack for easy collection flask removal
- Easy to clean all glass construction
- Small footprint
- Setup in a few minutes
- Free six feet 3/8" white premium food grade silicone vacuum tubing (a \$40 value) included

	Retail	Catalogue No.
Ai T1 Glass Vacuum Cold Trap for Safe Vacuum Operations	\$815.00	AIGVCT

Ai 2 Litre Short Path Distillation Kit with Options

Ai 2 liter short path systems offer you one of the best glassware in the market.

Features:

- Ai Heavy wall glassware for durability
- Downward material drain port
- Vacuum jacketed vapor channel
- Distillation head with multiple sets of vigreux
- Thermo port on distillation head: 14/20 joint
- Thermo port on boiling flask: 24/20 joint
- Boiling flask to distillation head: 24/40 joint
- Recirculating fluid and vacuum connectors: GL-16 adapter and 3/8" hose barb
- Glass material: high borosilicate glass 3.3
- Optional T1 cold trap prevents vapors being evacuated from entering a vacuum pump where they would condense and contaminate it
- Shipping dimension and weight: 27 x 22 x 9 inches, 14 lbs.

Warranty:

Glassware does not have warranties. Glassware may have minute blemishes that will not affect the function. If you believe there are imperfections on your glassware, please contact us. We check all our inventory and make sure no defective glassware is sent to our customers.

	Retail	Catalogue No.
Ai 2 Litre Short Path Distillation Kit with Options	\$1,640.52	AISPD2

Ai SolventVap 0.5G/2L Rotary Evaporator w/ Chiller & Pump 110V

A rotary evaporator is a device used in chemical laboratories for the efficient and gentle removal of solvents from samples by evaporation. The process of rotary evaporation is most often used to separate solvents with low boiling points, such as n-hexane or ethyl acetate, from compounds which are solid at room temperature and pressure. However, careful application also allows for the removal of a solvent from a sample containing a liquid compound, if there is minimal co-evaporation (azeotropic behaviour) and a sufficient difference in boiling points at the chosen temperature and reduced pressure.

	Retail	Catalogue No.
Ai SolventVap 0.5G/2L Rotary Evaporator w/ Chiller & Pump 110V	\$3,120.00	AIRE2

Ai SolventVap 1.3Gal/5L Rotary Evaporator with Motorized Lift

The new Ai SolventVap 5L series rotary evaporators is now UL/CSA compliant. This certification is required by many municipalities, and it also provides a higher standard of equipment safety and lifespan. All SolventVap come with all PTFE valves for solvent-resistant operations. Also come are vertical glassware and digital temperature/rotation control. Its optimized bath volume allows for rapid heat-up times. The condenser unit has specially designed glass tubes that utilize surface area extremely efficiently. That's why our SolventVap evaporators consistently deliver reliable and reproducible process results that are usually reserved for more costly systems. Another important aspect of the SolventVap is the safety features, which includes dry-run protection, water bath over-temperature shut-off protection, and fuse protection.

Rotary evaporator features a specially designed motor and worm gear, which provides constant rotation at speeds from 10 to 180RPM. As the flask containing the solvent is rotated, it continually transfers a thin layer of liquid over the entire inner surface. This gives a very large surface area for evaporation, which is caused by the gentle heating from the water bath. The rotating system is fitted with a special seal that allows the apparatus to be placed under vacuum, effectively reducing the boiling point of the solvents and removing the vapor phase, making the process much more efficient. Each unit is also equipped with an easy-to-use vacuum release and a continuous feed system, which allows solvent to be constantly drawn into the rotating flask without needing to stop the operation.

Digital water bath operates from ambient temperature to 99°C (210°F) with PID temperature control stepping at 0.1°C increments. Heating coils are located directly inside the pan for the most efficient heating possible. A built-in overheat protector will shut down power, should the controller fail.

Standard Glassware Set includes 1.32 gallon (5 litres) round-bottomed evaporating flask, 0.79 gallon (3 litres) round-bottomed receiving flask, and vertical condenser. Rotary evaporators with vertical glass condenser for are great for distillation of solvents with higher boiling points.

	Retail	Catalogue No.
Ai SolventVap 1.3Gal/5L Rotary Evaporator with Motorised Lift	\$5,257.56	AIRE5

Glass Cold Trap (Dry Ice) Condenser for Ai 2L Rotary Evaporator

2016 new design, high quality glass cold trap (dry ice) condenser with lid. No chillers needed, utilizes dry ice for optimal efficiency. Designed and specially made for Ai 2L SolventVap rotary evaporators.

Features:

- Glass material: high borosilicate glass 3.3
- Vacuum connector: G14 and 3/8" hose barb
- Receiving flask connector: 35/20 joint
- Feed tube connector: 19/26 joint

Package includes:

- Glass cold trap condenser x 1
- Glass lid x 1
- Lid gasket x 1
- G14 3/8" hose barb vacuum connector x 1
- Rubber bracket x 1

537°C 1/2" Fiberglass Rope for Insulating Boiling Flask

1/2" high-temperature, ultra-conformable fiberglass rope, they're flexible and will conform to uneven surfaces. The looser construction also makes them more likely to absorb liquids. Push them into the groove that's commonly built into oven doors, furnaces, and tanks.

These high quality fiberglass rope resist bleach, solvents, and most acids (do not use with hydrofluoric acid, hot phosphoric acid, and wet hydrogen chloride).

CAUTION! Always use proper protection when working with fiberglass. Avoid skin and eye contact.

	Retail	Catalogue No.
537°C 1/2" Fiberglass Rope for Insulating Boiling Flask	\$45.00	AIFR

Ai -20°C to 99°C 7L Capacity Compact Recirculating Chiller 240V

Ai C20 series recirculating chillers are the true thermostatic control laboratory chiller, this closed laboratory chiller is ideal for applications such as cooling rotary evaporators, analytical instrumentation, laser etching, ICP, vacuum systems, plasma etching and jacketed reactors. This system can also be used as a replacement to tap water cooling in laboratory applications.

Ai C20 are compressor-based recirculating chillers that offer outstanding performance and high reliability as well as quiet operation and ease-of-use. Powerful force/suction pump provides constant flow rates, while microprocessor PID controller gives you the ideal solution when you need precise temperature control or cooling below ambient temperature.

IMPORTANT! -20°C ULTIMATE TEMPERATURES ARE TESTED UNDER EMPTY LOAD CONDITION (NO ROTARY EVAPORATORS OR JACKETED REACTORS ATTACHED).

Features:

- Powerful 535 watts cooling capacity at -20°C
- Powerful 1000 watts heater
- Adjustable pumping speed up to 20 litres per minute
- 7" TFT touch screen controller
- No dry ice or liquid nitrogen needed
- ANSI standard all stainless steel reservoir
- All steel construction for durability
- Small footprint saves valuable lab space
- Cost saving as the water consumption is completely eliminated
- Plug and play, no assembly required

	Retail	Catalogue No.

Ai WaterVac 0.7 cfm 2-Head Recirculating Water Vacuum Pump

Ai WaterVac 0.7 cfm is an oil-free, portable, chemical resistant, 2-head recirculating water pump, with simplified maintenance, and no frequent and costly oil change. All major parts are made of PTFE, these economical vacuum pumps are perfect for tough lab applications.

Features:

- Long life, corrosion resistant, reliable
- All major valves and parts made of PTFE
- Whisper quiet operation
- Chemically resistant
- No oil changes, no cold trap required for water/alcohol solutions
- Virtually maintenance-free solution for laboratory environment
- Smaller footprint than oil pump saves lab space
- Designed to work with rotary evaporators

	Retail	Catalogue No.
Ai WaterVac 0.7 cfm 2-Head Recirculating Water Vacuum Pump	\$1,000.00	AIWV07

Ai -30°C 10L Recirculating Chiller with 20L/Min Centrifugal Pump

Ai C30 series recirculating chillers are the true thermostatic control laboratory chiller, these closed laboratory chillers are ideal for applications such as cooling rotary evaporators, analytical instrumentation, laser etching, ICP, vacuum systems, plasma etching and jacketed reactors. This system can also be used as a replacement to tap water cooling in laboratory applications.

Ai C30 are compressor-based recirculating chillers that offer outstanding performance and high reliability as well as quiet operation and ease-of-use. Powerful force/suction pump provides constant flow rates, while microprocessor PID controller gives you the ideal solution when you need precise temperature control or cooling below ambient temperature.

IMPORTANT! -30°C/-22°F ULTIMATE TEMPERATURES ARE TESTED UNDER EMPTY LOAD CONDITION (NO ROTARY EVAPORATORS OR JACKETED REACTORS ATTACHED).

Features:

- No dry ice or liquid nitrogen needed
- Advanced PID digital temp controller
- Built-in chilling fluid filter protects the recirculating pump and prevent blockage
- All steel construction for durability
- Cost saving as the water consumption is completely eliminated
- Built-in casters for mobility
- Plug and play, no assembly required

Cloud Cave – Trimmers

GreenBroz – 215 Dry Trimmer

Gentle. Quick. Quiet.

The GreenBroz 215 Dry Trimmer was designed to closely mimic the act of hand trimming your harvest while at the same time increasing the consistency and efficiency of your harvest process. While the 215 Dry Trimmer was primarily designed to be gentle and quiet, the 2-4 pounds per hour capacity allows you to trim your flower as quick as anyone in the game. Our patented design allows for the gentle rolling of the flower and a trim that allows the material to maintain its curves and unique shape throughout the trimming process. Whisper if you want. Or play music while you harvest. It's all possible with the 215 Standard Dry Trimmer as our 25-watt conveyor motor produces minimal noise. No vacuums or large attachments needed.

Specifications:

- **Construction:** Food-Grade Stainless Steel & HDPE
- **Power:** 240V / 25W / 0.1 Amp
- **Weight:** 19kg / 23kg with stand
- **Whisper Quiet Motor Speed:** 20 RPM
- **Trims** approximately 2-4 lbs. per hour
- **Forward/Reverse Switch**
- **Adjustable Timer**
- **Dimensions:** 18.63"W x 24.12"L x 16.75"H
With Stand: 19"W x 25"L x 21.5"H
- **Trim Collection Drawer**
- **Optional Trimmer Stand**

	Retail	Catalogue No.
215 Trimmer	\$9,510.00	GBDT215

GreenBroz – 420 Dry Trimmer

Gentle. Quick. Quiet.

The GreenBroz 420 Dry Trimmer was designed to closely mimic the act of hand trimming your harvest while at the same time increasing the consistency and efficiency of your harvest process. While the 420 Dry Trimmer was primarily designed to be gentle and quiet, the 8-12 pounds per hour capacity allows you to trim your flower as quick as anyone in the game. Our patented design allows for the gentle rolling of the flower and a trim that allows the material to maintain its curves and unique shape throughout the trimming process. Whisper if you want. Or play music while you harvest. It's all possible with the 420 Dry Trimmer as our 40-watt conveyor motor produces minimal noise. No vacuums or large attachments needed.

Specifications:

- **Construction:** Food-Grade Stainless Steel & HDPE
- **Power:** 240V / 40W / 0.17 Amp
- **Weight:** 30kg / 90kg with stand
- **Whisper Quiet Motor Speed:** Adjustable 1-20 RPM
- **Trims** approximately 8-12 lbs. per hour.

GreenBroz – CannaGin De-Stemmer

Speed up your harvest.

The GreenBroz 215 CannaGin De-stemmer is the perfect first step in the GreenBroz automated harvesting process. Various stem guides allow you to process multiple stems at a time, decreasing the amount of time between cut down and the final trim. The 215 CannaGin De-stemmer's stainless steel shearing doors allow you to apply pressure to your stems as needed, keeping you in control of the de-stemming process. Customisable speed control ranges from 0-80 RPM. Lock in your speed to resume de-stemming at your most recently saved RPM. The 215 CannaGin De-stemmer offers two spring-loaded stainless steel shearing doors and five various sized stem guides, allowing you to de-stem multiple branches at a time to maximize your efficiency and minimize the time between cut down and your next harvest step, which is imperative so that you can capture your flower at its absolute peak.

Specifications:

- **Construction:** Food-Grade Stainless Steel & HDPE
- **Power:** 240V / 25W / 0.1 Amp
- **Weight:** 13kg
- **Whisper Quiet Motor Speed:** Variable 1-80 RPM
- **Standby/Run Switch**
- **Forward/Reverse Switch**
- **Destem Rate:** 4-6 lbs. Per Hour
- **Dimensions:** 26"W x 8"L x 8.25"H
With Shroud & Ramp: 26"W x 15.75"L x 11"H
- **Alternate Faceplate:** 4 Spring-Loaded Shearing Doors
- **Stock Faceplate:** 2 Spring-Loaded Shearing Doors & 5 Various Sized Stem Guides
- **Rear Shroud Directs Stems for Collection**
- **Simple Clean Up**

GreenBroz – Sorter

Maintain Quality. Process Faster.

The GreenBroz Sorter is a revolution in size sorting for your cannabis harvest. Simple to use and gentle on your flower, our Sorter allows you to exponentially speed up your sorting process while maintaining that fine quality your cultivation is known for. Faster sorting times allow your flower to spend less time in the processing phase of your cultivation, in addition to being handled less by your staff, ensuring that your product remains as close to fresh off the stem as possible. Great care and precision went into developing our Sorter, which was built with food-grade materials like stainless steel and polyurethane. Maintain your quality while processing your flower faster with our Sorter!

Specifications:

- **Construction:** Food-Grade Stainless Steel & Polyurethane
- **Power:** 240V / 220W / 0.92Amp
- **Weight:** 137kg
- **Whisper Quiet Motor**
- **Sorting Sizes:** 3 adjustable pulley sizes available at a 1/4" spread, a 1 1/2" spread and a 2 1/4" spread (Some assembly required)
- **Sorts** 1+ lbs. per minute
- **7 user-defined sizes** with an exit ramp for large flowers
- **Dimensions:**
 - With Feeding Hopper: 109"W x 31.25"L x 47"H
 - Without Feeding Hopper: 82.5"W x 31.25"L x 44"H

CenturionPro 3.0 Trimmer

Introducing the newest addition to the CenturionPro family, the 3.0 trimmer, Medical Grade Trimming System. Not only is this the highest capacity automated trimming machine in the world, this system comes Health Canada/FDA ready with medical grade anodized aluminium and stainless-steel components to meet all regulatory standards.

The 3.0 trimmer is the highest capacity automated trimming machine in the world, guaranteed, producing the work of over 75 human trimmers without sacrificing quality. Suitable for either wet or dry flowers, this trimming machine will harvest a whopping 60-70 lbs dry (300-350 lbs wet) per hour of use.

Pre-Filter Nylon Bag

The CenturionPro Pre-Filter Nylon Bag was created with the vision-statement stating "there must be no wasted material."

This bag insures that no trichomes or sugar leaf is lost by sticking to the inside of the collector bag. The Pre-Filter Nylon Bag seamlessly fits within the outer cloth bag, allowing you to save all valuable properties and plant material. Its nylon texture integrates non-stick properties to prevent cannabis from sticking inside, making it easy to clean and empty. Even more so, making life really easy for anyone looking to re-use these leaf trimmings to make edibles or extracts. This product requires minimal maintenance and cleaning times, making it the perfect accessory for CenturionPro's elite family of bud trimmers. To wash, simply flip the inside out using a user-friendly pressure washing technique. This process takes only a couple minutes, allowing you to continue your job quickly.

Books and Magazines

CBD Made Easy

The book "CBD Made Easy" was written with the purpose of simplifying how cannabidiol works in the human body, listing all the known ailments cannabidiol can alleviate and then directly referencing the related medical studies all in one short publication. After reading this short book, patients should be able to approach their health professional with a reasonable understanding of how CBD will help them and a direction for utilising CBD as part of their treatment. The health professional can then directly access and read the relevant cited scientific studies, further educate themselves, and from that, more hastily & competently help the patient & their families achieve a better quality of life through the potential use of CBD.

	Retail	Catalogue No.
CBD Made Easy	\$20.00	CBDME
