

Product Information

PRODUCT NAME:

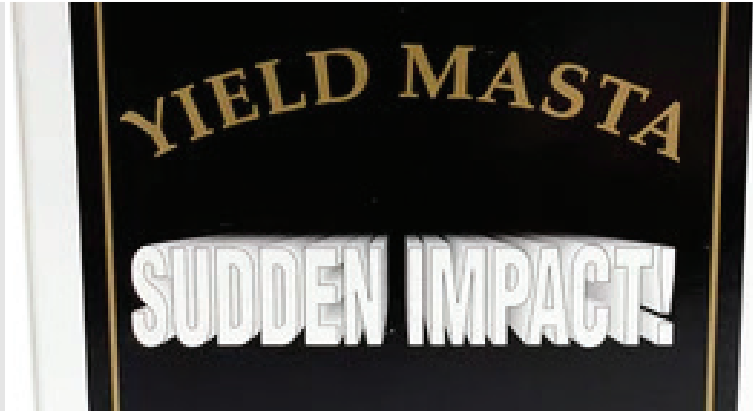

Yield Masta

PRODUCT CODES:

YMA - YMAA - YMB - YMBB

CATEGORY

Additives

**PRODUCT DESCRIPTION**

Height/Width	Rate
60 cm	15 mL / Plant
75 cm	20 mL / Plant
90 cm	25 mL / Plant
105 cm	30-35 mL / Plant
120 cm	35-40 mL / Plant
135 cm	50 mL / Plant
150 cm	60 mL / Plant
175 cm	70 mL / Plant
200 cm	80-90 mL / Plant

YIELD MASTA INSTRUCTIONS

TO BE USED WHEN LIGHT HOURS ARE REDUCED TO INITIATE FLOWERING

RUN TO WASTE SYSTEMS

Measure height and width of plant and refer to dosage chart.

High Plant Density - Dosage Rate

Pour the correct amount of A and AA into 2 litres of water and apply directly onto the medium of each plant - preferably when the plant hasn't been fed recently and is looking for food - this will ensure that the Yield Masta is absorbed quickly (about 12 hours) and that there will be no run-off.

Once you have applied this to all plants you should see signs of flowering in 3-5 days then repeat process using B and BB.

RECIRCULATING SYSTEMS

Measure height and width of plant and refer to the (above) dosage chart. Pour the total amount into brain / tub. e.g. 3 plants 105 cm x 105 cm = 35 mL each. Therefore, add total amount of 105 mL of A and AA directly into brain.

Repeat this process with B and BB as soon as there are signs of flowering (usually 3-5 days).
